# HARRIS SEEDS

NEW YORK STATE CERTIFIED  
**RUTGERS TOMATO**  
Harris' Northern Grown Strain - See page 31

# 1944

## WHOLESALE PRICE LIST

*For Market Gardeners and Florists*

**JOSEPH HARRIS CO., INC.** MORETON FARM  
ROCHESTER 11, N. Y.

# Please Read Before Ordering

## DELIVERY OF SEEDS

All Vegetable and Flower Seeds in this price list except Peas, Beans and Sweet Corn will be sent to places in the United States transportation charges prepaid. We will ship by parcel post, express or freight at our option. If seeds are ordered shipped by express where we would ship by freight, they will be sent by express collect.

Peas, Beans and Sweet Corn will be shipped at purchaser's expense, except as follows: If these seeds are included in any one order amounting to \$20.00 or more (not including Farm Seeds, Accessories, etc.) we will prepay transportation charges.

We will not pay transportation charges on Field and Grass Seed, Potatoes, Onion Sets, Accessories, Etc. These articles are always sent at purchaser's expense, except where they are quoted "Transportation paid" in this price list.

When ordering seeds shipped by freight or express please be sure to give the name of your nearest freight railroad station or express office if it is different from your post office address.

Freight shipments are now very slow and even mail and express are frequently delayed, so please send in your order well ahead of the time you wish to use the seeds. This year we cannot put up and hold orders for shipment later in the spring. All orders will be shipped as soon as possible after they are received.

## TERMS AND DISCOUNTS

*Cash discount now 3%*

Our regular terms are cash with order, for which we now allow a discount of 3% on vegetable and flower seeds and plants only.

No cash discount is allowed on Potatoes, Field Corn or Field Seeds, Grass Seeds, Insecticides and Accessories. All these items are strictly net cash with order at prices quoted.

**C.O.D. SHIPMENTS.** 25% of the value of the order must be sent with all orders for goods to be shipped C.O.D. No cash discount is allowed on C.O.D. shipments. Orders are handled more quickly and are less subject to delay if full cash payment accompanies the order.

**Plants will not be sent C.O.D.**

To **Market Gardeners** of established credit and those who furnish us with satisfactory references, we allow the following time payments on vegetable seeds and plants. (*Field and Grass seed, Potatoes, etc. are strictly cash with order and may not be charged.*)

Bills for seeds, plants, etc. shipped after December 1st are due and payable net August 1st.

Bills for goods shipped after August 1 are due net December 1st.

To **Florists** of established credit we allow the following time payments on flower seeds and plants.

Bills for seeds, plants, etc. shipped after December 1st are due and payable net June 1st.

Bills for goods shipped after June 1st, are due net December 1st.

## CONDITIONS OF SALE

No seeds are sold by us that we do not know are of good vitality and will grow under normal conditions. They are all tested and the per cent that germinates is marked on the package or label.

We assume responsibility of the seeds, plants and bulbs reaching the purchaser in good condition. However, in common with all responsible seedsmen, we give no warranty, express or implied as to the productiveness of any seeds, plants or bulbs we sell, and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed. We will not accept or fill orders under any other conditions.

Moreton Farm, Rochester 11, N. Y., Dec. 1, 1943

JOSEPH HARRIS COMPANY, INC.

### PLEASE NOTE

Our postal unit number: Rochester "11." All correspondence addressed to us should include this number. Also if you live in a city which has been divided into postal districts, please be sure to give us your number, as it will speed up the handling of mail.

### OUR GENERAL CATALOG

Our general catalog (containing more complete descriptions of the varieties listed here) is issued in January. Your copy will be mailed to you as soon as issued.

**MORETON FARM, ROCHESTER 11, N. Y.**

If we are out of any of the varieties ordered, shall we substitute others equally good? Ans. ....  
or shall we return the money sent for them? Ans. ....

# HARRIS SEEDS

## *1944 Price List for Market Gardeners and Florists*

Fred Rath, Joe Harris and Carl Warren checking the Sweet Corn Trials on Moreton Farm. Each year we carefully compare hundreds of strains and varieties, including many new ones, in order to insure that you get only the best when you buy Harris' Seeds.

## **Vegetable Seeds for 1944**

The war has created a definite shortage of many kinds of vegetable seed for 1944. Production is becoming increasingly difficult and the demand for seed is enormous not only for this country but for many other nations as well. With some exceptions, supplies of most items should be sufficient to take care of this great demand but there will be no surplus of any seeds this year.

Here on our own farms we lost some of our early crops because of the wet spring but have had good success with many later ones. We have been able to harvest fine crops of beans, corn, cucumbers, melons, summer and winter squash, and tomatoes and expect to be able to take care of our customers' normal requirements on our special strains of these seeds.

We are proud of our part in producing and distributing fine seeds for the growers who produce the nation's food. We assure our customers that in spite of shortages, we will not lower our standards and will continue to supply only the best seed that can be obtained.

### **CEILING PRICES**

At the time this catalog goes to the printers, ceiling prices are being considered for several kinds of vegetable seeds but nothing has been definitely settled as yet. The prices we have listed here conform to the proposed ceilings to the best of our knowledge.

### **ALLOW PLENTY OF TIME FOR YOUR ORDER TO REACH YOU**

The railroads are doing a magnificent job of moving war material, but they are severely over crowded and nearly all shipments are handled much more slowly than before. This applies not only to freight, which is frequently delayed, but even to mail and express.

Therefore we urge our customers to order their seeds well ahead of the time they wish to plant, and to be patient if they are not received as quickly as in the past.

---

PLEASE NOTE: *All prices here quoted are subject to change without notice and to our stocks being unsold.* For prices of seed in quantities less than listed here, please refer to our general catalog.

## ASPARAGUS

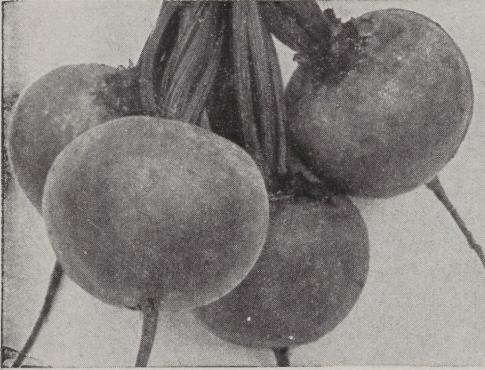

### 204 Mary Washington—Large, early and "rust resistant"

The best of the "rust resistant" varieties. Originated by the United States Department of Agriculture at Washington. Our seed is the true strain and will produce the finest large stalks. Oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.35; 10 lbs. \$12.50. *For roots see page 35.*

## ARTICHOKE

**201 LARGE GREEN GLOBE.** The Standard Variety. Produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia. Oz. 60c;  $\frac{1}{4}$  lb. \$1.75; 1 lb. \$6.00.

## BEETS

Harris' Special Crosby Beets

$\frac{1}{4}$  lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre for rows 14 in. apart; 6 to 8 lbs. per acre for rows 18 in. apart.

### 212 Harris' Special Crosby's Egyptian

Harris' Crosby is without question the best early bunching beet obtainable. It is very early, makes a good top and handsome dark red beets with small tap roots. Their smoothness and uniform shape makes them invariably the finest looking beets in the market, and they naturally command top prices.

We are proud of our stock of this grand beet, for it is backed by over thirty years of careful breeding here on our own farms. As we have said many times, "Every one a model for shape and color." See prices below.

### 216 Detroit Dark Red Short Top Strain

This refined strain of Detroit Dark Red is very similar to our Special Strain except that it has tops which average about 3 in. shorter. The roots are globe-shaped, smooth and attractive, with small tap roots. The skin is dark and the inside color is a good deep blood red.

We recommend this excellent strain as the best type to grow in the place of Harris' Special Detroit which we cannot supply this year. See prices below.

### 226 Perfected Detroit

This strain of Detroit Dark Red is a favorite of canners because of its beautiful dark interior color. The beets are somewhat flattened in shape and have a fine dark appearance so that they sell readily to canners and market buyers alike.

The color is very intense dark red with practically no zoning and the flesh is of excellent quality, being tender and sweet. The tops are tall and upright. We highly recommend this stock for both market and canning. See prices below.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.	100 lb.
210 Beets for Greens. (Green Top).....	\$ .55	\$1.75	\$16.50	\$155.00
A distinct, rapid growing variety, selected to produce fine tops quickly.				
212 CROSBY'S EGYPTIAN. Harris' Special Strain. See above...	.75	2.75	26.50	250.00
215 DETROIT DARK RED. Harris' Special Strain.....	....	Crop Failed	....	....
This is our own strain, producing heavy crops of smooth round beets of fine shape and color. Very uniform and attractive stock. No seed available this year because of failure of our crops. We recommend Detroit Dark Red, Short Top, and Perfected Detroit as the best available varieties.				
216 DETROIT DARK RED. Short Top Strain. See above.....	.75	2.75	26.50	....
217 Early Blood Turnip.....	.55	1.85	17.50	....
A good old variety. Large, somewhat flattened beets. An early cropper.				
219 EARLY WONDER. A Superior Strain for Bunching.....	.75	2.75	26.50	250.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is exceptionally fine.				
222 LONG SEASON. Also called "Winter Keeper".....	.90	3.00	28.50	....
A very late variety of extra fine quality. Description in Retail Catalog.				
224 LONG SMOOTH BLOOD RED. (True Strain).....	.90	2.75	26.50	....
8 to 10 inches long and very dark red. Grows half out of the ground.				
226 PERFECTED DETROIT. Famous for Fine Color. See above	.70	2.50	24.00	....

## MANGELS—For Stock

Six to eight pounds of seed will sow an acre.

	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
546 DANISH YELLOW GIANT. The Heaviest Yields.....	\$ .50	\$1.50	\$14.00
550 MAMMOTH LONG RED. The Most Popular Variety.....	.50	1.50	14.00

## BEANS

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

\*At the prices here quoted, beans are not prepaid. Purchaser pays transportation on beans except as follows: If your order for vegetable seed including beans amounts to \$20.00 or more we prepay freight charges. (See also inside front cover).

### 85 Tendergreen

#### The Favorite Round Pod Green Bean

Tendergreen is our largest selling round green bean and fully deserves its excellent reputation. It is early, hardy, and of outstanding quality, and is widely used by market growers wherever round beans are grown.

The pods are round, handsome and straight; entirely stringless and with tender rich meat. They are produced in great abundance on sturdy upright vines. See prices below.

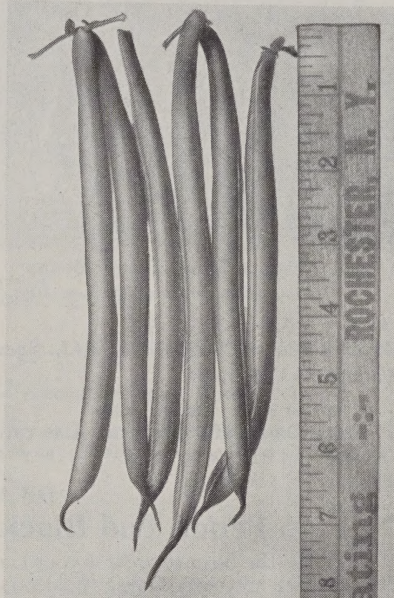

### 50 New Long Tendergreen

#### New Round Green Bean of our Introduction

We take great pride in introducing this outstanding new variety. For years we have considered Tendergreen the very finest variety of round green beans, so when we say New Long Tendergreen is even better, we can give it no higher praise. The beans are of the same excellent type but much longer, averaging at least a full inch greater length. They mature a day or two later than the regular Tendergreen and yield very heavy crops of attractive long slender beans of the highest quality.

If your market wants a round green bean, we urge you to try New Long Tendergreen. See prices below.

**Note:** The supply of seed is limited and we can offer only 15 lbs. to a customer.

#### New Long Tendergreen

#### DWARF GREEN-PODDED BEANS

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

	NOT PREPAID* (See above)			
	1 lb.	7½ lb.	15 lb.	100 lb.
18 BOUNTIFUL. Selected Stock. . . . .	\$ .40	\$2.35	\$4.35	\$26.00
The handsome early pods are long, straight, light green and entirely stringless. There is no better stock of this well known variety.				
14 Black Valentine. . . . .	.40	2.20	4.05	24.00
A profitable market bean, produces large crops of long, straight, oval, light green pods. Not stringless except when very young.				
31 Giant Stringless Green Pod. . . . .	.40	2.30	4.20	25.00
Slightly curved, round pods, stringless of excellent quality.				
50 NEW LONG TENDERGREEN. See above. . . . .	.45	2.70	5.00	....
60 PLENTIFUL. (New) See below. . . . .	.40	2.35	4.35	26.00
78 STREAMLINER. (New) Long Flat Pods, Heavy Yield. . . . .	.40	2.50	4.65	28.00
Bears enormous crops of very attractive pods, straight slender and exceptionally long. Excellent for shipping and for markets where fine appearance counts the most. White Seeded.				
80 STRINGLESS BLACK VALENTINE. . . . .	.40	2.35	4.35	26.00
One of the most prolific and earliest green beans. The pods are long, straight and handsome; they are nearly round when young, becoming oval or semi-flat as they mature. One of the best and most profitable market beans.				
85 TENDERGREEN. Early Prolific. Round Pod. See above. . . . .	.40	2.55	4.80	29.00

Plentiful—Heavy Yields of Fine Long Pods

### 60 Plentiful (New)

This new variety is now well established and is extremely popular among growers of flat-podded beans. In some large markets, because of the attractive appearance and fine quality it has brought a premium over other varieties. The pods resemble Bountiful but are longer and a few days later. They are bright green and very good looking; stringless and of the finest quality. Black Seeded.

The vines are upright, robust and produce large crops. It is one of the heaviest yielders. We urge you to grow Plentiful this year. See prices above.

**French Horticultural Beans**

*Typical plants in one of our seed fields.*

## HORTICULTURAL BEANS

### 28 French Horticultural

#### *Harris' Special Stock*

*You can't go wrong on Harris' Special Stock of French Horticultural Beans.*

Our customers have amply demonstrated the plain fact that no finer stock of this variety can be obtained.

This is a pure line strain which we have increased from a single plant that we selected in 1928 and is outstanding for its uniform long pods, superb coloring and high yield.

Particular growers find it superior to any stock sold, and fully equal to the finest of the jealously guarded "private stocks." See prices below.

		NOT PREPAID* (See page 3)			
		1 lb.	7½ lb.	15 lb.	100 lb.
28 FRENCH HORTICULTURAL. Special Stock. See above.....		\$ .40	\$2.55	\$4.80	\$29.00
47 Lowe's Champion.....	One of the Horticultural or Cranberry beans. Pods 4 in. long, flat, green, straight and entirely stringless.	.40	2.35	4.35	26.00
71 Ruby Dwarf Horticultural. Also called "Roman" Beans.....	Used for shelling green. Pods light green splashed with deep red.	.40	2.40	4.50	27.00

## DWARF WAX VARIETIES

### 55 Pencil Pod Black Wax—*The Best Round Podded Wax Bean*

This is the bean to grow if your trade wants a round pod wax variety. This is a carefully bred stock, which has been especially selected for vigor, high yield and true type. Growers in all sections have been greatly pleased with this stock. *Crop very short.* See prices below.

### 82 Sure Crop Wax—*The Best Flat Wax Bean*

If you want a *flat* wax (yellow) bean, grow our strain of Sure Crop. It is fully equal to any and much superior to most stocks offered. It is vigorous, healthy and of upright growth, producing enormous yields of long straight pods. One of the most popular and profitable wax beans to grow. See prices below.

*25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.*

		NOT PREPAID* (See page 3)			
		1 lb.	7½ lb.	15 lb.	100 lb.
55 PENCIL POD BLACK WAX. See above.....		\$ .45	\$2.50	\$4.65	\$28.00
68 ROUND POD KIDNEY WAX or Brittle Wax.....	Pods 5 to 6 in. long, straight, round, clear yellow, stringless and medium early.	.45	2.50	4.65	28.00
82 SURE CROP WAX. The Best Flat Wax Bean. See above.....		.40	2.50	4.65	28.00
88 UNRIVALLED WAX. For Early Market.....	A heavy yielder of attractive narrow, flat, clear yellow pods of refined appearance. A few days earlier than Sure Crop.	.40	2.50	4.65	28.00
90 WEBBER WAX or "Wonder Wax." The Earliest Wax.....	Long, straight, flat stringless pods. Quite free from rust and a heavy bearer. Also called "Cracker Jack."	.40	2.50	4.65	28.00

## LIMA BEANS

### 25 Fordhook Bush Lima—*The Most Profitable Dwarf Lima*

Our stock of this fine bean has earned an outstanding reputation for high yield and quality among successful growers. The pods are uniformly large with choice thick green beans. See prices below.

		NOT PREPAID* (See page 3)			
		1 lb.	7½ lb.	15 lb.	100 lb.
11 BABY FORDHOOK. New Small Thick Seeded Type.....	Early and extremely prolific. Pods resemble Henderson's but are smaller and thicker; 3 to 4 plump seeds per pod, very high quality.	\$ .40	\$2.30	\$4.20	\$25.00
20 Burpee's IMPROVED Bush Lima.....	Larger pods, thicker, deeper green beans than the old variety.	.40	2.30	4.20	25.00
25 FORDHOOK BUSH LIMA. Best for Market. See above.....		.40	2.35	4.35	26.00
33 Henderson's Bush Lima.....	Small flat pods and beans, early and very prolific.	.40	2.20	4.05	24.00
35 IDEAL or Mammoth Podded POLE LIMA.....	Pods often 8 in. long, early and prolific. <i>This is the best large podded Pole Lima.</i>	.40	2.30	4.20	25.00

For better stands and increased yields—Treat Lima Beans with **SPERGON**. See page 48.

## POLE BEANS

*A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills.*

### 44 King Horticultural—Harris' Special Large Seeded Strain

This variety is superior to French Horticultural both for yield and disease resistance. The pods are only about an inch shorter and slightly wider than French Horticultural. They are very attractive, being heavily splashed with bright scarlet at the shell stage, straight and entirely stringless. When put on good, well drained land, they can be grown without any support. When grown this way the pods are just as long and straight and they can be picked as easily as the dwarf kinds. This large seeded strain is of our own growing. See prices below.

*25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.*

	NOT PREPAID* (See page 3)			
	1 lb.	7½ lb.	15 lb.	100 lb.
38 Kentucky Wonder. Also called "Old Homestead".....	\$.40	\$2.35	\$4.35	\$26.00
<i>Long, slender, green pods of fine quality. Early and very prolific.</i>				
40 KENTUCKY WONDER, Harris' Special Strain. Heavy Yields	.40	2.35	4.35	26.00
<i>This is the most uniform and prolific strain of Kentucky Wonder. Long slender pods. Has the added advantage of being white seeded.</i>				
39 Kentucky Wonder Wax.....	.40	2.35	4.35	26.00
<i>Long, flat, yellow pods of fine quality. One of the best wax pole beans.</i>				
44 KING HORTICULTURAL. Special Large Seeded Strain. See above.....	.40	2.50	4.65	28.00
75 SCOTIA. Fine for Roadside Markets.....	.40	2.35	4.35	26.00
<i>Extremely prolific, with round slender green pods of the finest quality. Has proved very profitable as a high quality bean for discriminating trade.</i>				

## FIELD BEANS

*Sow about 60 lbs. per acre.*

	NOT PREPAID* (See page 3)			
	1 lb.	7½ lb.	15 lb.	100 lb.
16 BOSTON MARROW or White Marrowfat. Perry Strain.....	\$.30	\$1.75	\$3.15	\$18.00
63 CALIFORNIA RED KIDNEY.....	.30	1.80	3.30	19.00
66 Robust Pea Beans. N. Y. State Certified.....	.25	1.45	2.55	14.00
91 White Kidney.....	.35	1.95	3.60	21.00

## BROCCOLI

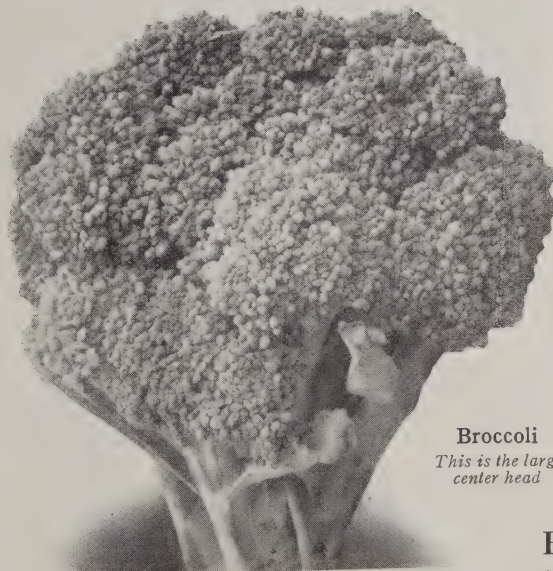

### 230 Italian Green Sprouting (Calabrese Strain)

*1 oz. of seed will produce about 2000 plants.*

This is the best stock which can be obtained and is the true "Calabrese" strain. It is early, vigorous and very uniform and you can depend on it to produce the finest compact center heads and an abundance of large side shoots. No better seed can be bought at any price.

**Note:** Where small center heads are wanted for bunching, it has been found practical to sow the seed in 2½ foot rows and thin the plants to 3 to 6 inches. This will produce an abundance of small heads and side shoots.

Oz. 60c; ¼ lb. \$1.75; 1 lb. \$6.00.

Broccoli  
*This is the large center head*

## BRUSSELS SPROUTS

*1 oz. will produce about 3000 plants.*

### 236 Catskill—Heavy Producer—Firm Sprouts

Obtained originally from Mr. Arthur White of Arkville, N. Y., this excellent strain is considered the best by expert growers in the Catskills where the finest Brussels Sprouts in the country are produced.

We regret very much that because of failure of our crop, we are unable to offer any seed this year. We are carrying on the strain, however, and hope to have a good supply for another year. *Crop failed.*

### 238 Long Island Improved

This is a very satisfactory and dependable stock, producing an abundance of large firm sprouts. The plants are uniform, dwarf and heavy yielding. We can recommend this strain highly.

¼ oz. 35c; ½ oz. 55c; oz. \$1.00; ¼ lb. \$3.40; 1 lb. \$12.00.

## CABBAGE

*One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.*

### Cabbage Seed for 1944

The supply of cabbage seed for 1944 is extremely short. In 60 years of business we do not recall any time when cabbage seed was so scarce as it is now. Most of the seed is grown in the Northwest and this area had its worst winter in many years, killing a large proportion of the heads that were being carried over for seed. As a result there is little cabbage available that was grown from true selected stock seed.

Much of the cabbage that is being offered was produced in California from fields which had been planted for market and then left to go to seed when the shortage became evident. These stocks are of course not as true or uniform as the regular strains. With the exception of the "Early Market," all the seed we are selling is of our true regular strains.

We trust our customers will appreciate the great difficulties of this situation and will help us in trying to make the supply go as far as possible. Growers should be very careful in sowing in order to make every seed count. If you have any seed left from last year, be sure to use it.

### 264 Enkhuizen Glory Yellows Resistant (Globe)

For growers who have any indication of "yellows" on their farms, we recommend this large heading variety of Enkhuizen Glory type. It is a fine uniform stock and produces heavy yields of fine cabbage. Excellent for kraut and also satisfactory midseason type for market. See prices below.

### 281 Marion Market Yellows Resistant

Great improvement has been made with this stock, so it is now as uniform and true as any of this class. The heads resemble our regular Copenhagen Market but are several days later and somewhat larger. It is now widely used for both market and kraut and should be grown whenever there is any indication of "yellows" in your soil. *Supply short.* See prices below.

Marion Market

### 262 Early Market—(Copenhagen Type)

This is a vigorous strain resembling our regular Copenhagen Market in general appearance, but is not as true or uniform in type. It matures early, ripening a few days later than our Golden Acre, and will produce good yields of market cabbage.

The seed we offer was grown in California from fields which had been planted for market and then left to go to seed. It is not a refined stock but it is the best available substitute for our regular Golden Acre and Copenhagen Market, and we offer it so that our customers can grow some early cabbage. See prices below.

### Early and Medium Early Varieties

	Oz.	¼ lb.	Lb.
250 COPENHAGEN MARKET. True Large Headed Stock. . . . .	...	Crop Failed	...
Larger and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. About 10 days later than Golden Acre.			
261 EARLY JERSEY WAKEFIELD. Early Pointed Heads. . . . .	\$ .50	\$1.45	\$4.95
A popular extra early variety with small upright pointed heads of excellent quality. Our strain is particularly fine, the heads being very uniform and early.			
262 EARLY MARKET. (Copenhagen Type) See above. . . . .	.60	1.75	5.95
263 ENKHUIZEN GLORY. . . . .	.55	1.55	5.45
Large round, medium early type for market and kraut. Heads as large as the late kinds and mature much earlier. The heavy yields make this a most profitable variety.			
264 ENKHUIZEN GLORY Yellows Resistant. (Globe) See above. . . . .	.60	1.75	5.95
270 GOLDEN ACRE. The Earliest Cabbage. True Stock. . . . .	.70	...	...
This is the same fine true stock we have sold for years. Heads round, uniform and very early. <i>Crop very short.</i>			
272 GOLDEN ACRE Yellows Resistant. . . . .	...	Crop Failed	..
281 MARION MARKET. Yellows Resistant. See above. . . . .	.60	1.75	5.95

**"Yellows" Resistant Cabbage**

An increasing number of farms each year are showing "yellows sick" soil. Yellows resistant varieties are the only kinds to grow where ground is badly infected with yellows. In many sections where there is slight yellows infection, the ordinary varieties can be grown, but the resistant kinds usually do much better and produce large crops.

Our Yellows resistant varieties have been so carefully developed that you can now grow many of your favorite types of cabbage in a yellows resistant variety.

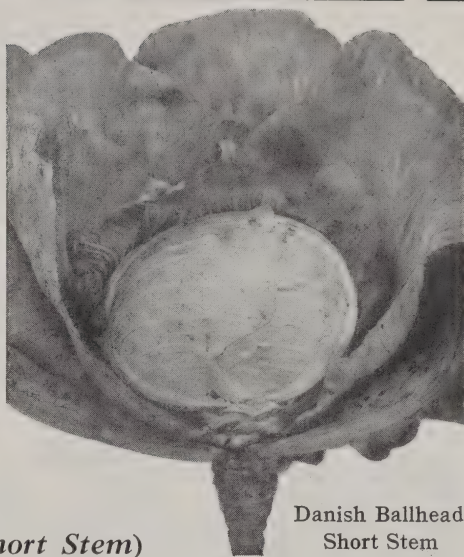

*This year we offer the following stocks:*

**Marion Market**

**Enkhuizen Glory, Yellows Resistant**

(Globe)

**All Seasons, Yellows Resistant**

**Danish Ballhead**  
Short Stem

**255 Danish Ballhead (Short Stem)**

*For Late Crop and Storage*

This is a very fine strain of short stemmed Danish cabbage. It is not identical to the strain we have previously sold but we have had it growing in our farm this year and have been well pleased with it. It is a true heavy yielding stock that will produce large crops.

The heads are very uniform for size and shape and of fine appearance. They are very firm and solid, slightly flattened in shape and carry a slight tinge of purple. Excellent for late market and storage. See prices below.

**Late or Main Crop Varieties**

	Oz.	$\frac{1}{4}$ lb.	lb.
<b>242 ALL SEASONS. Yellows Resistant.</b> . . . . .	\$ .50	\$1.30	\$4.35
A large late domestic type producing heavy crops of fine quality cabbage for kraut. Heads broad, semi-flat and very solid. Highly resistant to yellows.			
<b>245 BUGNER. Yellows Resistant.</b> . . . . .	...	Crop Failed	...
Because it is yellows resistant, this old variety is becoming more in demand. It is later than Danish Ballhead, and has larger and more flattened heads. A very heavy producer.			
<b>255 DANISH BALLHEAD. Short Stem. Heavy yielding strain.</b> See above..	.70	2.15	7.10
<b>275 HARRIS BALLHEAD.</b> . . . . .	...	Crop Failed	...
Our own special strain of Danish Ballhead, with round solid heads and enormous yields of the finest cabbage.			
<b>285 PENN STATE Ballhead. True Stock.</b> . . . . .	...	Crop Failed	...
Short stemmed type with very solid heads, somewhat flatter than most Danish. Large yields and good storage qualities.			
<b>288 Premium Flat Dutch.</b> . . . . .	.50	1.45	4.95
Old standard variety with heavy flat heads.			
<b>292 SUPER CURLED SAVOY. The Best Variety.</b> . . . . .	.70	1.90	6.60
<b>Finest Market Gardeners Strain.</b> Closely resembles Chieftain. Fine heads, more savoyed, earlier and more compact plants than most Savoy. This is the most uniform stock we have ever seen and is the type best liked by Long Island growers.			
<b>295 WISCONSIN HOLLANDER. Yellows Resistant.</b> . . . . .	...	Crop Failed	...
The best "yellows" resistant Danish type. Under normal conditions will produce fine crops on "yellows sick" soil where ordinary Danish cabbage will not survive.			
<b>279 MAMMOTH ROCK RED. Sure Heading Strain.</b> . . . . .	...	Crop Failed	...
The largest red cabbage. The heads are hard, medium round and deep red. This is the best red kind for market or shipping.			

**Chihli**

**248 CHINESE CABBAGE—Chihli**

*This is the Best Variety.*

This is the most popular kind and best for market and roadside stands. It has almost entirely replaced all other kinds. The heads are very attractive, often 18 in. long, uniform in shape and size, hard and firm. This variety is by far the best to grow. A profitable crop on muck, as it commands a ready market, and can also be held in storage for winter sales.

Sow the seed in July or August; the crop matures in 8 to 10 weeks. 1 to  $1\frac{1}{2}$  lbs. will sow one acre.

Oz. 45c;  $\frac{1}{4}$  lb. \$1.20; 1 lb. \$4.00.

## CAULIFLOWER

*One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.*

### Cauliflower Seed for 1944

Growers of cauliflower should be particularly careful to get only the finest stocks of seed for 1944, and they will do well to buy from sources upon which they can rely absolutely.

Our special strains are now grown in this country and it has been definitely proved that they are fully equal to the best seed that was imported from Europe. We are pleased that we can supply our customers' requirements of these fine stocks, and at reasonable prices. You do not have to pay exorbitant prices for your cauliflower seed as there is no better seed than ours to be obtained at any price. While we have a good supply of seed we suggest that our customers order their seed early.

**Snowball Perfected Strain**

*Andrew Bonnet, Rochester, N. Y. displays some of his fine crop.*

### 340 Snowball Cauliflower Perfected Strain

*"No better seed can be bought at any price"*

This is the stock that it pays to grow! Year after year under good and poor growing conditions our strain continues to produce the largest percentage of fine large uniform number one heads; the kind that bring the top prices. It is recognized by the leading growers in the East as the best cauliflower grown.

The heads are unusually deep and heavy, of uniformly good size, beautifully white with a tight attractive curd.

We are glad to assure our customers that again this year we can supply their usual requirements of this fine strain. See prices below.

### 343 Snowdrift

*Also Called White Mountain and Improved Holland Erfurt*

In the same season as Snowball, producing large firm heads which are very white. This variety is popular in many sections and is sold under a variety of names. Ours is an extremely fine true stock which has given excellent results for our customers. We recommend it highly. See prices below.

### 345 Super Snowball—True Stock Famous for its Large Early Heads

A very early large heading kind. Under favorable conditions of soil and weather, it produces wonderfully fine crops, a majority of the heads being ready during a short period of time.

Cauliflower growers recognize the value of this fine variety and our customers have found that although there are many strains now offered under a large number of names, our seed has never been surpassed. See prices below.

### 333 New Early Purple Head The Best Purple Cauliflower

We are proud that we can again supply our customers with seed of this fine strain of purple cauliflower, as growers in many sections have found it a most profitable kind to grow. Ours is the best strain of purple cauliflower obtainable, producing tight uniform good size heads fully two weeks earlier than other purple stocks. Ready to cut the first of October from plants set out late in June.

If your market knows the fine quality and delicious flavor of purple cauliflower, be sure to grow New Early Purple Head this year. See prices below.

	$\frac{1}{4}$ oz.	oz.	$\frac{1}{4}$ lb.	lb.
333 New Early Purple Head. See above.....	\$ .90	\$3.00	\$10.00	....

## CARROTS

*An ounce will sow about 300 feet of row. It requires 2 to 4 lbs. of seed for an acre, depending on how far the rows are apart.*

### 315 Nantes—Coreless

#### *Smooth and Handsome—Finest Quality*

This is the attractive *coreless* variety that is used so much for early bunching as well as a topped carrot on many markets. The carrots are six to seven inches long, nearly the same size the entire length and stump rooted. The smooth waxy surface and uniform cylindrical shape gives them a most handsome market appearance. They are entirely coreless and of finest quality.

We highly recommend this excellent and popular variety. See prices below.

### 322 Supreme Half Long

#### *An Excellent New Market Carrot*

This new carrot is a more slender refined, coreless strain of Danvers type and very popular with many growers. The roots are 6 to 7 inches long, smooth and gently tapering. Both the skin and flesh are deep orange colored, and the core is small and "red." The tops are not too large, making this an excellent carrot for both bunching and busheling. See prices below.

### 312 Imperator

#### *Outstanding for Bunching*

This is the fine bunch carrot from California which is found on Eastern markets. It grows just as well here and has become very popular for high class bunching trade. The carrots are often eight inches long, smooth, somewhat tapering and deep orange in color. The tops are just right for bunching. We offer the true stock. See prices below.

**Red Cored Chantenay**

*As grown in our trial grounds.*

### 320 Red Cored Chantenay

#### *Heavy Yielding Type Preferred by Cannery*

We have an excellent stock of this popular carrot and our customers are highly pleased with it. This stock will produce enormous crops of fine smooth carrots, and has been so improved in recent years that it is practically 100% red cored. It is used both for market and as a high quality kind for canning. Red Cored Chantenay does remarkably well on muck, making a long smooth root of very attractive appearance. See prices below.

	Oz.	1/4 lb.	lb.	10 lb.	25 lb.
305 CHANTENAY. Special Strain—Long.....	\$.35	\$1.00	\$3.00	\$29.00	\$70.00
An extra fine strain, growing fully an inch longer than the old strains or the Red Cored. The roots are smooth and uniform and the yields of fine carrots are enormous.					
320 CHANTENAY, RED CORED. See above.....	.40	1.20	3.50	34.00	82.50
308 DANVERS HALF LONG. A Heavy Cropper.....	.35	1.00	3.00	29.00	70.00
We have a pure heavy yielding stock of this popular variety.					
310 HUTCHINSON. True New England Type.....	.40	1.20	3.50	34.00	82.50
Produces large roots 9 to 10 in. long, nearly the same size the whole length and stump-rooted. Color light orange. This carrot yields large crops and is used extensively as a topped carrot in the New England area and other large markets in the East. We have a very superior and dependable stock.					
312 IMPERATOR. See above.....	.40	1.20	3.50	34.00	82.50
315 NANTES. (CORELESS) See above.....	.50	1.45	4.50	44.00	105.00
322 SUPREME HALF LONG. See above.....	.45	1.35	4.00	39.00	92.50
325 TENDERSWEET. The Sweetest Carrot.....	.45	1.35	4.00	39.00	92.50

This carrot is being grown more and more for market. The roots are large, smooth and tapering, of striking deep orange red color. They are a good bunching carrot and are of very superior quality.

Cornell 19

Makes Large Beautiful Bunches.

## CELERY

*An ounce of seed will produce about 8000 plants.  
It requires 20,000 plants to the acre.*

### 358 Cornell 19 (New)

#### *Main crop type of High Quality—Resistant to Yellows*

This is a beautiful new celery developed by Cornell University and already a great success on both muck and upland. It is a yellow self-blanching type combining all the best qualities of the green Pascal celeries—the stalks are very long, smooth-ribbed and deeply rounded, and the flesh is thick and tender and without strings. The heart is well developed and the excellent quality is carried even on the outer stalks.

It is resistant to yellows and the growth is vigorous and healthy producing very large yields. We recommend it especially for main crop as it tends to produce seeders if planted too early. The stalks blanch quickly and hold up well in storage. See prices below.

### 365 Golden Plume or Wonderful—Original Strain

This is our original type of Golden Plume which has proved so successful with our customers. The stalks are very large with remarkably heavy hearts and with thick solid stems.

Many of the best celery growers in the country get their seed of Golden Plume from us. They find that they can get best results without having to pay a fancy price for their seed. See prices below.

### 370 Masterpiece—Early—Golden

This fine new early variety has become very well liked by celery growers. The plant is robust and fairly tall with long (8-9 in.), broad, very thick rounded stems. The quality is superior being tender, free from strings and of the finest flavor. See prices below.

### 377 Summer Pascal—New, Early Green Celery of Superior Quality

Because of its earliness, fine quality and attractive appearance, this new celery has become very popular in New England, Pennsylvania and other sections where green celery is grown. The plant is medium tall, very uniform with long, thick, rounded stalks. The stems blanch quickly and are of the finest quality. This is an early variety, ripening shortly after Easy Blanching.

Our strain is the best of many we have grown and tested. See prices below.

#### *Yellow or "Self-Blanching" Varieties*

	$\frac{1}{2}$ oz.	oz.	$\frac{1}{4}$ lb.	lb.
358 CORNELL 19. (NEW) See above. .... $\frac{1}{4}$ oz. 60c	\$ .90	\$1.75	\$5.50	\$18.00
365 GOLDEN PLUME or WONDERFUL. Original Strain. See above. ....	.45	.85	2.85	10.00
366 GOLDEN PLUME. Upland Strain. .... $\frac{1}{4}$ oz. 35c	.55	1.00	3.40	12.00
A fine early celery of the same type as our Original Strain but grows about two inches taller. Preferred by many growers especially for upland.				
370 MASTERPIECE. (New) See above. .... $\frac{1}{4}$ oz. 40c	.65	1.25	4.25	15.00
382 SUPREME GOLDEN. New Tall Type. .... $\frac{1}{4}$ oz. 35c	.55	1.00	3.40	12.00
Taller and earlier than the old Golden Self-Blanching which this has now displaced. The stems are long, thick and make a good heart. The plant is very compact and erect, making an excellent pack.				

#### *Green Varieties*

361 EASY BLANCHING. "Newark Market" or Sanford Superb. .	.40	.75	2.35	8.00
It has the same dwarf, compact habit of growth as Golden Self-Blanching, and is of fine quality. Leaves are green and the stalks blanch white.				
363 GIANT PASCAL. Special Strain. (Late). ....	.40	.75	2.35	8.00
Largely used in New England and is considered one of the very best for late winter market. The stalks are large, solid and blanch pure white				
375 SALT LAKE or UTAH. The Favorite Green Celery. . $\frac{1}{4}$ oz. 35c	.55	1.00	3.40	12.00
One of the finest kinds for fall crop. The stalks are very thick, crisp and of highest quality. We have a beautiful stock.				
377 SUMMER PASCAL. (New) See above. .... $\frac{1}{4}$ oz. 60c	.90	1.75	5.50	18.00

### CELERIAC—Turnip-Rooted or "Knob" Celery

352 LARGE SMOOTH PRAGUE. This is the standard market garden variety, producing good size bulbs of the finest type. Oz. 65c;  $\frac{1}{4}$  lb. \$2.00; lb. \$7.00.

## SWEET CORN

*One pound of seed will plant 350 to 400 hills; 10 to 12 lbs. will plant an acre. A bushel weighs 48 lbs.*

### Harris' Northern Grown Sweet Corn

For many years we have made a specialty of growing both hybrid and open pollinated sweet corn seed here in the North on our own and nearby farms. Combining scientific breeding and careful selection with the greatest care in growing, drying and cleaning, we produce seed corn of the highest standard of vitality and purity. Harris' Northern grown sweet corn is the best obtainable.

#### HYBRID SWEET CORN

The large number of hybrid varieties now offered make it difficult for the grower to select the best. Each year we thoroughly test many of these and we now offer seven hybrids which we have chosen as the best, covering the season from extra early to late or main crop. Our hybrid corn is grown from proven pure line parents and great care is taken in detasseling the seed parent.

Hybrid corn cannot be saved for seed the next year as it will break down.

### 130 North Star

#### *New Extra Early Hybrid (67 days)*

This new Harris' Hybrid introduced by us in 1941 is already a tremendous success. It ripens only a few days after Seneca 60 yet has the same fine large ears as many later varieties, and growers everywhere praise it in glowing terms. They like its rapid and vigorous growth, the enormous yield and the large delicious ears.

The kernels are deep, creamy gold and exceptionally tender and sweet. Ears are fully 7 inches long, mostly 12 rowed, and well protected by a fine large husk which makes them most attractive. The ears sell at a premium on sight, and the wonderful flavor and tenderness brings the customers back for more. See prices on page 13.

**Note:** While we have a good supply of seed for this year, we expect a very heavy demand and urge our customers to order early and avoid disappointment.

### 125 Marcross C6.13—

#### *Early—Uniform Large Ears Wilt Resistant (68 days)*

Popular early hybrid ripening a day or two later than North Star and noted for its remarkably uniform large ears. The stalks are short and sturdy and the ears are 12 rowed, about 7 inches long with light golden yellow kernels of very good quality.

The strain we offer is a most uniform and attractive stock, and we recommend it highly.

Completely resistant to wilt (Stewart's Disease). See prices on page 13.

Northern Cross

*"I have had fine success with your Northern Cross and North Star Sweet Corn."*

*Elbert Walker, Labette, Kansas. Mar. 15, 1943.*

### 132 Northern Cross

#### *An Early and Tremendous Yielding Hybrid (73 days)*

Since its introduction by us in 1938 this hybrid has proved to be a money maker for the grower. It is a variety of great vigor with fine strong sturdy plants which will produce great crops of large even ears. There are usually two and sometimes three good ears to a plant. It is truly a tremendous yielder of fine large ears and is well suited to fill the gap between the extra early and later kinds.

These large ears are very uniform in size, usually eight inches long with 12-14 rows of bright yellow kernels. They are very attractive in appearance and of exceptionally high quality.

**Caution:** Northern Cross is not resistant to Stewart's Disease (wilt). See prices on page 13.

*"Your sweet corn is the best yielder of any anywhere and every one goes wild over the fine ears, especially Northern Cross."*

*Harold Shaffer, Boswell, Penn. Mar. 15, 1943.*

**SWEET CORN continued on next page.**

### 108 Early Bancross 39 (74 days)

Has proved a winner for growers who want a large uniform ear maturing before Golden Cross Bantam. They are practically the same size and shape and are ready fully *ten days earlier*.

The plant is rugged and prolific, with the majority of the plants producing two good ears. It is moderately resistant to Stewart's Disease (wilt), and has produced large early crops where other corn has failed entirely.

Our seed of this new hybrid has been produced under our careful supervision by a top cross of Purdue 39 on our *own* selected stock seed of Harris' Extra Early Bantam. This corn should be sown at the same rate as the open pollinated varieties. See prices on next page.

**Ioana**

*Large ears of fine quality.*

### 115 Golden Cross Bantam

**High Yielding—Finest Quality (84 days)**

One of the first Hybrid corns to be developed and still unsurpassed. It is now universally recognized as the standard high quality midseason type. The demand has been so great that many inferior stocks are being offered and growers should be particularly careful to get their seed from reliable sources. Our strain is the best obtainable and is outstanding for uniformity and high yield. Every pound was grown from tested pure line parents and the seed rows were thoroughly detasseled.

This stock will produce large crops of beautiful ears of remarkably uniform length (about 8 in.) and with 12 rows of bright golden yellow kernels. They mature about a week later than the old fashioned Golden Bantam with the whole crop ripening at nearly the same time.

*For best results sow not more than six pounds per acre.*  
See prices on next page.

### 123 Ioana

**Large Eared—Midseason—Wilt Resistant (86 days)**

Developed by Dr. E. S. Haber of Iowa State College, this outstanding new hybrid has been welcomed by sweet corn growers as an exceptionally fine large eared variety for main crop.

The ears are large, slightly tapering, mostly 8 to 9 inches long with 12 to 14 rows (a few 16) of creamy yellow, medium deep kernels, which fill the ear well at the tip.

These large attractive ears are of fine quality being sweet and tender. The plant is tall and strong and is *resistant to Stewart's Disease (wilt)*.

In some sections where large crops of sweet corn are grown for market, some of our customers prefer it even to Golden Cross Bantam. See prices on next page.

*"I tested 2 lbs. of your Ioana corn last year side of 40 lbs. of the Cooperative's seed corn varieties and it was the best yielder of all and the wonder of all Market Gardeners in my section."*

*Edwin J. Edwards, Norwich, Conn. April 27, 1943.*

### 120 Harris' Extra Early Bantam—Heavy Yielding—Very Early (68 days)

Introduced by us in 1927; this has proved one of the most profitable varieties for the grower ever offered. In spite of the growing demand for larger ears in some markets, many growers find that because of the earliness, large yield and superior quality, Harris' Extra Early Bantam is still on their "*must grow*" list. It is not only an extremely heavy yielder but is one of the earliest varieties maturing ears which can be sold at high prices before the market becomes flooded.

The ears resemble true 8-rowed Golden Bantam in size and shape and high quality but mature ten days earlier. They are up to 7 in. long with 8 to 10 rows of golden yellow kernels and are very uniform in size and appearance. See prices on next page.

#### **When Different Varieties Mature**

We give after the names of the different varieties listed in this catalogue the approximate number of days in which the corn matured in our trials that were planted about the middle of May. As the time required varies greatly according to the weather, time of planting, and fertility of the soil the figures should be regarded as relative rather than actual.

## 141 Whipple's Yellow Harris' Original Northern Grown Strain.

*A Leader for over 20 Years (77 days)*

We are the *original* introducers of Whipple's Yellow Corn and since its introduction in 1920 we have constantly bred and selected it for earliness, uniformity of size and high yield.

We have seen many other stocks of Whipple's Yellow grown in comparison with our own, and without exception ours stands head and shoulders above all the rest. *You cannot afford to grow just an ordinary strain of this fine corn.*

Every pound of this variety which we sell is grown here in the North, on or near our own farm under our supervision from our own carefully bred stock seed. See prices below.

### SWEET CORN—Yellow Varieties

**Note: 25 lbs. or more of ANY ONE VARIETY will be supplied at the 100 pound rate.**

\*At the prices here quoted, sweet corn is not prepaid. Purchaser pays transportation on sweet corn except as follows: If your order for vegetable seeds, including corn, amounts to \$20.00 or more we will prepay the FREIGHT charges. See also inside front cover.

*Write for special prices on larger lots than quoted here.*

## CUCUMBERS

$\frac{1}{4}$  lb. of seed will plant about 300 hills or 200 ft. of row.  
It requires about 2 lbs. per acre in hills or 3 to 4 lbs. drilled.

**A & C Cucumbers**

*Ray Stall shows some fine fruit in our crop.*

### 400 A & C

#### *The Leading Variety for Market and Shipping*

The long slender shape and handsome dark green color have made this one of the most popular cucumbers grown today. They are very deep green over the entire fruit, with only indistinct blossom end rays and they hold their color well. The exceptionally fine market appearance usually brings premium prices.

The cucumbers are 8 to 9 inches long, beautifully proportioned, smooth and dark green, and make a very fancy pack. The vines are healthy and produce large crops of the finest fruit.

Our strain is outstanding for uniformly fine shape and color, and we recommend it highly. See prices below.

### 420 Harris' Perfection—Long Green White Spine—Heavy Yields

The fruit is straight, smooth and handsome, deep green in color with small white rays at the blossom end, and retains its deep color for a long time after picking. The cucumbers will average well over eight inches long when ready for market and are just the right thickness.

Since we introduced Harris' Perfection in 1916, we have kept the stock under our entire control, working constantly to improve the type, yield and uniformity. Even though there have been several very fine varieties of this type introduced in the past few years, many of our customers still prefer Harris' Perfection because of its heavy yield and fine appearance.

This variety is adapted for dill pickles as well as for general market. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.

438 STRAIGHT EIGHT. See next page. ....	.30	.85	2.75	26.00	240.00
442 West India Gherkin. ....	.35	1.00	3.00	....	....

### 438 Straight Eight—*A Very Prolific Long White Spine*

Has become very popular among growers because of the large early yield of fine straight cucumbers. Straight Eight produces heavy crops at a time when the other kinds are only just beginning to bear. The vines continue to produce heavily throughout the season.

When ready for market the cucumbers are 8 to 9 inches long, straight, smooth and blunt ended. The color is medium green with green rays at the blossom end. We can recommend Straight Eight for a money making crop. See prices on preceding page.

### 418 Harris' Double Yield

#### *The Best Kind for Pickles*

We are proud to say that our new improved strain of this famous variety is better than ever before. The yields are even greater and the perfect shape makes it ideal for small pickles.

The cucumbers are very straight with blunt ends, smooth, cylindrical, and medium deep green in color. The fine shape is carried on all sizes of fruit. (See photo.)

If the pickles are kept picked off, the vines produce astonishing crops. Young cucumbers are often produced in clusters of 3 or 4 like the fingers of your hand.

This is also the earliest variety we know and many growers use it for early slicers; it matures to slicing size two weeks earlier than other kinds. See prices on preceding page.

Harris' Double Yield Pickles

### 425 Irondequoit Hothouse—*Greenhouse Grown Seed*

This is the famous variety which has been developed by the greenhouse growers around Rochester. The seed has been saved for us from perfect fruit grown under glass by an expert cucumber grower in Irondequoit. It will produce remarkably fine uniform cucumbers. The fruit is long, slender, and deep green, almost entirely solid, having very few seeds. The vines are vigorous and very prolific. 100 seeds 75c; 250 seeds \$1.75; 500 seeds \$3.25; 1000 seeds \$5.50.

## WITLOOF CHICORY—French Endive

**386 WITLOOF CHICORY. Special Forcing Strain.** An exceptionally fine strain, grown from selected roots and produced by us here on our farm. Will give a high percentage of perfect heads when forced. Oz. 50c;  $\frac{1}{4}$  lb. \$1.50; lb. \$5.00.

## COLLARDS

**390 GEORGIA.** Large cabbage-like leaves, which grow loosely on stems 2½-3 ft. tall. Does not form heads. May be sown in spring and transplanted like cabbage or drilled in June or July. Popular in the South for table use and stock feeding. Oz. 15c;  $\frac{1}{4}$  lb. 35c; lb. 90c; 10 lbs. \$8.00.

**CRESS—EXTRA FINE CURLED**—Crop failed.

## DANDELION

### 453 Large Thick Leaf

Our strain is the popular thick leaf, dark green type, with strong, upright growing plants and good hearts. It is the most widely grown variety and we have a particularly fine stock.

Oz. 60c;  $\frac{1}{4}$  lb. \$1.75; lb. \$6.00; 10 lbs. \$55.00.

### 451 Improved Arlington

This is a special strain of the Arlington type, white ribbed. Leaves very dark green, thick and attractively cut. Plants not as upright as above. True seed produced on our own farm. Oz. 60c;  $\frac{1}{4}$  lb. \$1.75; lb. \$6.00; 10 lbs. \$55.00.

### 452 Italian Dandelion. (Cicoria Catalogna)

Large dark green dandelion-like leaves, which are cut several times during the season for "greens." Ours is the true stock. Oz. 50c;  $\frac{1}{4}$  lb. \$1.45; lb. \$4.50; 10 lbs. \$40.00.

Large  
Thick Leaf  
Dandelion

## DILL

**458 LONG ISLAND MAMMOTH** is much superior to the common dill, being larger and more productive.

Oz. 15c;  $\frac{1}{4}$  lb. 40c; lb. \$1.25; 10 lbs. \$11.50.

## EGG PLANT

*An ounce of seed will produce about 2000 plants.*

### 461 Black Beauty—Prolific Strain

We can strongly recommend this stock as it is the finest strain of Black Beauty that we have ever seen. The plants are strong and sturdy, producing an abundance of uniformly large handsome dark purple fruit even here in the North. See prices below.

Oz.  $\frac{1}{4}$  lb. lb.

**461 BLACK BEAUTY. True Stock.** See above. . . . . \$ .60 \$1.90 \$6.50

**463 EARLY LONG PURPLE.** . . . . . .. Crop Failed ..

Fruit 7 to 9 in. long, not over 2 to 3 in. through. Early and very prolific, deep purple.

**465 NEW HAMPSHIRE HYBRID. Early and Prolific.** . . . . . Crop Failed ..

Very early, producing large crops of medium size oval fruit.

## ENDIVE

*An ounce of seed will sow about 100 feet of row; 2 to 2½ lbs. per acre.*

Oz.  $\frac{1}{4}$  lb. lb.

**471 DEEP HEART FRINGED. Broad fringed leaves. (New)** . . . . . \$ .25 \$ .65 \$2.00

An entirely distinct type, recently introduced and very popular. Large and robust plants with broad fringed leaves and upright growth. Produces a fine deep heart when fully grown.

**478 GREEN CURLED PANCALIER. Best for Late Market. Pink Ribbed** . . . . . .20 .55 1.75

The leaves are not so finely cut as the Green Curled. Has fuller, heavier hearts. A favorite of market gardeners. This variety does best on rich soil.

**477 GREEN CURLED. Also called "Chicory." Green ribbed.** . . . . . .20 .55 1.75

Leaves finely cut and curled. Exceptionally uniform with a fine heavy heart.

**475 FLORIDA DEEP HEART.** . . . . . .20 .55 1.75

Broad leaves, dark green, slightly curled, produces large deep heads, which blanch well in the center. One of the best varieties, especially for late market.

**473 FULL HEART BATAVIAN (Escarolle). True Dark Green Strain.** . . . . .20 .55 1.75

Our strain of this variety produces heads which are tightly packed with broad dark green leaves. The full hearts blanch to a beautiful golden color.

**French Endive—Witloof Chicory** See under *Chicory* on preceding page.

## FENNEL

**481 FLORENCE.** An exceptionally fine strain, producing large bulbs. Oz. 25c;  $\frac{1}{4}$  lb. 75c; lb. \$2.50.

## GARLIC

The bulbs should be separated into flakes or "cloves" and set out like onion sets. Bulbs for planting: Lb. 65c; 5 lbs. or more at 60c per lb. Transportation paid.

## KALE

*One pound of seed will sow about one acre of land.*

$\frac{1}{4}$  lb. lb.

**487 DWARF CURLED or Blue Scotch.** . . . . . \$1.60 \$5.50

Very fine curled leaves, of dwarf habit and deep bluish green color.

**489 SIBERIAN. Also called "Sprouts".** . . . . . 1.20 4.00

Dwarf spreading, broad leaves curled only at the edges. Color blue gray. Very hardy.

## KOHL RABI

*An ounce of seed will sow about 200 ft. of row.*

**492 EARLY WHITE VIENNA.** Round white bulbs, early. A very uniform stock. Can be used 10 weeks after sowing. Oz. 75c;  $\frac{1}{4}$  lb. \$2.30; lb. \$8.00.

## LEEK

*An ounce of seed will sow about 200 feet of row.*

**496 AMERICAN FLAG or GIANT MUSSELBURG.** The stalks are large and very sturdy. The bottoms are clear pearly white and smooth with the white part extending well up the stalk. Oz. 75c;  $\frac{1}{4}$  lb. \$2.30; lb. \$8.00.

## LETTUCE

*An ounce of seed will sow 250 ft. of row; about 2 lbs. per acre.*

### Lettuce Seed for 1944

There is a definite shortage throughout the country of the "Iceberg" or Imperial varieties of lettuce seed for 1944. Plantings were late and not large enough and the seed crops were far too small to meet the demand. In order to make the available supplies go as far as possible, we urge growers not to purchase any more seed than they actually need and to use the greatest care in sowing in order to reduce waste. If you have seed left over from last year we believe it will probably give satisfactory results for planting in 1944.

#### 525 Imperial 44

##### *Sure Heading "Iceberg" for the East*

Imperial 44 is still the leading "Iceberg" type to grow in the East and except during the hot weather of mid-summer, it is the variety which does best on most soils, both muck and upland. It produces crops that compete successfully with western grown Iceberg.

The head is true Iceberg type, solid and of finest quality. Muck grown heads are usually a little larger than on upland. *Crop failed.*

**White Boston**—*Special Sure Heading Strain.*

#### 542 White Boston—*Special Strain*

Year after year this has proved to be a most dependable stock. One of the outstanding features of our strain is the uniform manner in which it heads, so that there is practically no waste in cutting a crop. It has proved to be more resistant to tip burn than any variety we have ever seen.

You cannot get a better strain of White Boston Lettuce no matter what you pay for the seed. Our stock is fully equal to any strain obtainable. See prices below.

	Oz.	¼ lb.	lb.
501 BIG BOSTON.....	\$.25	\$.65	\$2.25
504 Black Seeded Simpson. Excellent Loose Leaf Type.....	.20	.60	2.10
510 COSBERG (New). Fine quality.....	.40	1.25	4.25
Small headed Iceberg type of fine quality, very crisp and tender.			
517 GRAND RAPIDS.....	.25	.70	2.35
Excellent for outdoor as well as greenhouse growing and is used by the most critical growers. The leaves are light green, uniformly well curled.			
518 GRAND RAPIDS U. S. No. 1.....	..	Crop Failed	..
A distinct well curled strain which is preferred by some growers for greenhouse use.			
525 IMPERIAL 44. See above.....	..	Crop Failed	..
526 IMPERIAL 447. Black Seed.....	.35	1.05	3.45
Known for its ability to produce fine solid heads of "Iceberg" type. Will produce good heads in July as well as early spring and fall. Heads larger than Imperial 44 and a little later. Popular with many growers.			
530 May King. For Frame Forcing.....	.30	.80	2.60
A very early head lettuce for open ground or forcing.			
535 NEW YORK No. 515. Improved "Iceberg" Type.....	.35	1.05	3.45
Earlier than New York No. 12 and preferred by most growers. Recommended for upland growing only. Heads are large and solid. This is the sure heading strain which has pleased our customers for a number of years.			
542 WHITE BOSTON. Special Strain. See above.....	.30	.80	2.60
<i>Cos or Romaine Lettuce</i>			
540 TRIANON SELF-FOLDING.....	.25	.70	2.35
The most popular variety, making large long heads of fine quality and attractive appearance. Used for forcing under glass and outdoor culture.			
514 DARK GREEN COS.....	.25	.70	2.35
This strain has the same upright self-folding type of head as Trianon, but is not quite as tall and the leaves are of darker green color. The heads are cylindrical and very solid. Well liked for fall planting as it stands frost well.			

*"I raised your Imperial 44 lettuce last year and think it is the finest I ever raised."*

*Geo. H. Boyden, Boylston, Mass. Mar. 25, 1943.*

## MUSKMELONS or Cantaloupes

*An ounce of seed will plant about 50 hills; 2½ to 3 lbs. per acre.*

### Harris' Muskmelon Seed

Growing seed of early, highly productive and fine quality muskmelons for northern Market Gardeners has been one of our specialties for over twenty years. Our fields have been remarkably free from disease and our special strains are now considered the standard of excellence. You can be sure that these are the best muskmelons for the North.

### 570 Market King

#### *A Fine Quality Melon for Market and Shipping*

These melons are so remarkable for their uniform sweetness and high flavor that one can actually cut hundreds without finding a poor melon. For this reason alone many growers are changing to Market King each year. This is an exceptionally good variety for shipping as well as for local market.

The melons are medium size, grow very evenly, and are extremely heavily netted. They are oval in shape without deep ribs. The skin turns to a creamy yellow when ripe. The flesh is very thick with a small seed cavity, deep orange in color and of fine texture.

The vines are more healthy and vigorous than any kind we have seen, producing an enormous yield of fine fruit. This melon ripens normally a few days later than Bender's Surprise.

Our crop this year was particularly fine, and we are pleased to offer disease-free seed of high germination. See prices on next page.

**Market King Melons**

*Thick fleshed and very sweet.*

### 558 Bender's Surprise

#### *Harris' Special Northern Grown Strain*

This is still the leading large melon for the East, and our strain has as yet no equal for combined large size, attractive appearance, fine flavor and long keeping qualities.

We have bred and grown this stock for over twenty years here on our own farm always paying special attention to high quality, earliness and trueness of type. This careful selection has made ours the one outstanding stock of this variety.

Although this is *not* the true old Irondequoit, which has practically disappeared from trade, growers and consumers refer to this variety now when they say "Irondequoit" melons.

There is no use buying inferior seed when Harris' Northern Grown Bender's can be purchased at the low price we charge. See prices on next page.

### 560 Delicious

#### *The Earliest Large Melon*

This fine melon is becoming more and more popular for local markets and roadside stands. It is the earliest large melon of high quality grown, and we recommend it most highly. As it will not stand long distance shipping, we do not recommend it for this purpose.

Our strain is noted for earliness, large yield, vigor of vine, uniform size and type, and remarkably sweet flavor. *Crop short.* See prices on next page.

**Harvesting Bender Melons on Moreton Farm**

### HOTENTS for Melons

These large strong field forcers are ideal for vine crops such as melons and cucumbers. Economical and practical. Used by successful growers everywhere. See Inside Back Cover.

## MUSKMELONS—Continued

	Oz.	¼ lb.	lb.	10 lb.
555 <b>ARISTOCRAT.</b> . . . . .	....	Crop Failed	....	....
Large melons with very thick flesh of high quality. Does not keep well enough for general shipping, but fine for roadside stands.				
558 <b>BENDER'S SURPRISE. Harris' Special Strain.</b> See preceding page. . . . .	\$ .40	\$1.20	\$3.50	\$32.50
560 <b>DELICIOUS. The Earliest Large Melon.</b> See preceding page. . . . .	.45	1.30	4.00	....
564 <b>HALE'S BEST. For Distant Markets</b> . . . . .	.25	.65	2.00	....
The earliest and best of the Rocky Ford type for the East. Medium size, oval fruit. Very heavily netted. Flesh thick, deep orange and of finest quality. Ours is an excellent stock with fruit that is remarkably uniform in size, shape and quality.				
566 <b>Hearts of Gold (Large strain)</b> . . . . .	.25	.75	2.50	22.50
A fine melon for shipping, medium in size, round and well netted. Flesh thick, orange yellow, of uniformly excellent flavor. We have a fine stock of the large strain of this well known variety.				
568 <b>HONEY ROCK or SUGAR ROCK.</b> . . . . .	.25	.75	2.50	22.50
We have a fine stock of this popular melon which is largely grown in many sections because of its attractive appearance, fine flavor and ability to stand handling. The melons are nearly round, about 5" in diameter.				
570 <b>MARKET KING.</b> See preceding page. . . . .	.40	1.20	3.50	32.50
572 <b>Queen of Colorado or Pride of Wisconsin.</b> . . . . .	.30	.90	3.00	27.50
Similar to A & C, Jersey Gold, etc. Fruit medium size, oval shape with shallow ribs and good netting. Flesh thick and fine flavored. True heavy-bearing stock.				

## WATERMELONS

*An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.*

The varieties we have listed here are all suitable for growing in the North, as they are early kinds and in our climate under usual conditions will produce ripe fruit before frost from seed sown in the open ground. See our general catalog for full descriptions.

	Oz.	¼ lb.	lb.	10 lb.
581 <b>DIXIE QUEEN</b> . . . . .	\$ .20	\$ .55	\$1.75	\$16.00
Early and very productive. Skin light green with darker stripes. Flesh deep pink, of fine quality. Stands up well for shipping and an excellent kind for local market or shipping. True stock.				
583 <b>HUNGARIAN HONEY. The Sweetest Watermelon.</b> . . . . .	.20	.45	1.35	12.50
585 <b>STONE MOUNTAIN. Try This One For Market.</b> . . . . .	.15	.40	1.20	11.00
Large, oval somewhat flattened ends. Fine quality and prolific.				
588 <b>WINTER QUEEN. White Skin—Long Keeper.</b> . . . . .	.15	.40	1.25	11.50
591 <b>WONDER MELON</b> . . . . .	.15	.45	1.50	14.00
The largest and best of the oblong varieties for growing in the North. They are early, dark green with bright red flesh of fine quality. Will produce large crops even when the seasons are short.				
580 <b>GREEN CITRON or Colorado Preserving.</b> . . . . .	.15	.40	1.25	11.50
Not a true watermelon, outer flesh is used in preserving. Very prolific. Green seeded.				

## MUSHROOM SPAWN

*Full directions for growing are sent with each order of spawn.*

Finest pure culture spawn. Mushrooms can be raised in cellars or under greenhouse benches where the temperature can be kept between 50 and 60 degrees.

Ours is pure culture spawn grown by one of the largest mushroom producers.

**BOTTLE SPAWN.** (White.) Grown in bottles under sterile conditions after which the bottle is removed and the spawn packed in a carton. One carton will spawn 40 sq. ft. of bed.

**Price: Single Carton \$1.35; 3 cartons \$3.45. Prepaid.** Not prepaid: 10 or more cartons at 90c per carton. Weight per carton about 1 lb. *Write for prices on larger quantities.*

## MUSTARD

*An ounce of seed will sow about 300 feet of row.*

	Oz.	¼ lb.	lb.	10 lb.
594 <b>FORDHOOK FANCY. (Long Standing)</b> . . . . .	\$ .15	\$ .45	\$1.50	\$14.00
Leaves are slightly smaller and more finely cut and curled than the Southern Curled. A very pure stock.				
595 <b>LONG STANDING. (Southern Curled)</b> . . . . .	.15	.45	1.50	14.00
Will stand without bolting to seed for a long time. During the hottest part of the summer this variety has stood for three weeks after it was large enough to cut, without going to seed. The leaves are a medium dark green with beautiful finely curled edges.				

## OKRA or GUMBO

597 **PERKINS' LONG-POD. Standard Market Variety.** Large green pods. Ours is a true uniform stock. *An ounce of seed will sow about 50 feet of row. Oz. 15c; ¼ lb. 30c; lb. 85c.*

## ONIONS

*An ounce of seed will sow 125 feet of row. It requires 5 to 6 lbs. of seed per acre.*

### Onion Seed for 1944

Seed of this important vegetable is again short because of the heavy demand. While we have fairly good supplies of most varieties, we urge our customers to order early.

You can buy Harris' onion seed with every confidence. We will not handle seed of inferior quality or poor germination under any circumstances.

**Brigham Yellow Globe**

*Noted for heavy yields and fine storage quality.*

### 620 Sweet Spanish Utah Strain

**Large Mild Sweet Onions of  
Finest Quality**

This fine large onion can be grown almost anywhere in the East and is becoming more popular each year. It is an excellent variety both for upland and muck. The onions are large and handsome often weighing a pound or more and are fine keepers.

They require a little more time than the early varieties but are vigorous, hardy growers, withstanding adverse growing conditions better than any other kind we know. See prices on next page. See also plants on next page.

**Sweet Spanish, Utah Strain**

### 605 Early Yellow Globe The Best Early Yellow Onion

Earliness, enormous crops, fine appearance and unusually good handling and keeping qualities have made this variety the leading early onion both for upland and muck.

The onions mature two weeks before Brigham Yellow Globe, are nearly globe shaped, deep yellow in color and with a good skin. *Crop short.* See prices on next page.

*"I wish to state your onion sets and seeds are the best I ever planted. I recommend them to any one."*

*William Kitson, Troy, N. Y. Feb. 25, 1943.*

### Harris' Onion Sets

We supply clean, firm, uniform and true to name onion sets. These are the best onion sets that can be obtained. See prices and varieties under ONION SETS on next page.

ONIONS—Continued

628 Yellow Globe Danvers. ....	.60	1.75	6.00	58.00	....

ONION SETS

12 to 20 bushels of onion sets are required to plant an acre.

EBENEZER. The Best Yellow Sets. Bu. (32 lbs.) \$9.25; 2 Bu. \$18.00; 10 Bu. or more \$8.75 per Bu. Purchaser pays transportation.

WHITE or Silverskin. Best for Bunching. Bu. (32 lbs.) \$9.75; 2 Bu. \$19.00; 10 Bu. or more \$9.25 per Bu. Purchaser pays transportation.

Please note: We do not ship any onion sets until after the middle of March.

"Last year I bought some of your Ebenezer onion sets and had wonderful results. They were the best onions I raised in many years and I have tried onion sets each year for 20 years."

M. C. Skilton, E. Northfield, Mass. Feb. 16, 1943.

ONION PLANTS

Sweet Spanish—Utah Strain

These plants which are grown in Texas have proved excellent for raising both early green onions and dry bulbs for late summer sale. When set in the spring, they will produce large firm onions of the finest type in 8 to 10 weeks.

Each year more gardeners find it profitable to grow onions from our plants, and our sales have steadily and rapidly increased. Experience has shown that Sweet Spanish is the only satisfactory kind, so we do not offer any other variety.

Please note: Onion plants are sold on the basis of bunches only. In Texas they are pulled by the handful, and each handful is called a bunch. 60 of the bunches are packed in a crate and shipped to us. The number of plants in a bunch usually runs from 50 to 110 depending largely on the size of the plants, and it is impossible for us to specify the number of plants in a bunch.

Price: 10 bunches \$3.00 transportation paid. Not paid, full crate (60 bunches) \$10.00. (Weight about 30 lbs. per crate.)

Write for prices on larger lots, which may be shipped direct from Texas.

Shipping onion plants: We expect to have onion plants ready to ship by April 15th, but we are dependent on the Texas conditions and may not have them in until somewhat later. They cannot be supplied after May 25th. If you will specify on your order when you would like the plants to be sent, we will do our best to ship at that time. Because of the weather and transportation difficulties, they may not arrive promptly, but you may be assured that we are doing everything we can to get them to you as near the proper time as possible.

A Single Bunch of Our Sweet Spanish Onion Plants

## PEAS

*One pound of peas will plant 100 ft. of row. Two to five bushels per acre.*

\*At the prices here quoted peas cannot be sent prepaid. Purchaser pays transportation on peas except as follows: If your order for vegetable seeds including peas amounts to \$20.00 or more we will prepay the freight charges.

### 160 Greater Progress (New) Large Dark Green Pods

As the name implies this is an improved Laxton's Progress, ripening with us about two days earlier, and bearing more uniformly large pods and a heavier yield.

The vines are not tall, only about 18", but they are husky and literally loaded with large well filled deep green pods (4-4¼ in.). They ripen only a few days after World's Record and they mature evenly over a very short period. The pods are all of the same uniform large size giving a most handsome appearance when picked for market. See prices below.

### 190 Thomas Laxton

#### Early Peas of Fine Quality

This old favorite is always popular and is still one of the largest selling kinds because of its dependable yields and excellent quality. The pods are medium size (about 3 in.) with blunt ends, and are closely packed with sweet tender, delicious peas. They ripen very early, only a few days after the earliest kinds and are most profitable for early crop.

Ours is an excellent strain of the true type and very heavy yielding, so that this variety frequently out yields many of the larger podded types. See prices on next page.

### 165 Laxton's Progress

#### Large Podded—Medium Early

We offer a very superior stock of this excellent variety which is still one of the best kinds to grow. Our strain produces heavy yields of large handsome pods with great regularity.

The vines grow 15 to 18 in. high and produce an abundance of large dark green pods about 4" in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop. These handsome, well filled pods always find a ready sale.

We recommend Laxton's Progress very highly. See prices below.

### 180 Midseason Giant

#### (Giant Stride, Wyoming Wonder, etc.)

This variety comes on between the early sorts and the late varieties and has shown a remarkable ability to stand up and bear well in *hot dry weather*. The pods are large (4½ to 5 in. long) dark green and pointed. The yield is large, the pods being borne in great numbers on strong vigorous vines about 24 in. high. See prices on next page.

#### Early Varieties

*25 lbs. or more of one variety will be supplied at the 100 lb. rate. 1 bu. weighs 56 lbs.*

	1 lb.	7½ lb.	15 lb.	56 lb.	100 lb.
158 GRADUS, or Prosperity. (2½ ft.) Early.....	\$ .35	\$2.05	\$3.75	\$12.30	\$22.00

<i>Matures a few days later than World's Record and has well-filled pods; vines stocky. An excellent variety.</i>					
183 Nott's Excelsior. (15 in.) Early.....	.40	2.10	3.90	12.90	23.00
<i>Dwarf vines, medium-sized pods; one of the best early dwarf peas.</i>					

**Greater Progress Peas**

*Large, uniform and prolific.*

*"Your Greater Progress peas are about the last word in quality and production."*

W. H. Freemantle, Oswego, N. Y.  
July 8, 1943.

#### NOT PREPAID\* (See above)

## PEAS—Continued

NOT PREPAID\* (See page 22)

	1 lb.	7½ lb.	15 lb.	56 lb.	100 lb.
190 THOMAS LAXTON. (3 ft.) Early. See preceding page	\$ .40	\$2.10	\$3.90	\$12.90	\$23.00
195 WORLD'S RECORD. (2½ ft.)	.40	2.25	4.20	14.00	25.00
The earliest large podded pea and very profitable for early crop. Pods 3 to 4 in. long, pointed, medium dark green and very attractive. Ours is an excellent heavy yielding stock.					
<b>Medium and Late Varieties</b>					
152 ALDERMAN. (4½ to 6 ft.) Dark Podded.	.40	2.10	3.90	12.90	23.00
Larger pods and better yielder than the old Telephone. This is the best pea in the Telephone class. Pods are 5 to 6 in. long and of a deep green color. Our stock of Alderman is very superior.					
155 DWARF ALDERMAN. (2 ft.) Large Pods.	.40	2.20	4.05	13.45	24.00
Large dark green pointed pods (4½ to 5 in.) ready same time as Alderman. Vines sturdy and produce immense crops.					
168 LINCOLN. (2½ ft.) Finest Quality.	.40	2.20	4.05	13.45	24.00
Long narrow pods completely filled with 8 to 9 peas of superb quality. Produces immense crops which are very easily picked. One of the earliest of the Midseason group and a fine variety which we recommend highly.					
180 MIDSEASON GIANT. (2 ft.) See preceding page.	.40	2.20	4.05	13.45	24.00
185 ROGERS GILBO. (24 in.)	.40	2.25	4.20	14.00	25.00
One of the best of the Midseason group. Produces heavy yields of long attractive pods, 4½ to 5 in., dark green, pointed and well filled.					

## PARSLEY

*An ounce of seed will sow about 200 feet of row.*

## 635 Paramount—The Outstanding Parsley

This is the finest and most uniformly curled strain of parsley we have ever seen. It is slightly more dwarf and slower growing than Perfection. The leaves are all finely curled, of a rich deep green and with stems of good length. There are no flat leaves. Altogether this is a superb variety both for outdoor growing and forcing and we recommend it highly. See prices below.

	Oz.	¼ lb.	1 lb.	10 lb.
631 CHAMPION, or Triple Moss Curled.	\$.15	\$.40	\$1.25	\$11.50
This is a very superior strain. Although not quite as finely curled as Paramount, it is an early, rapid growing stock which will produce an abundance of fine parsley and give satisfaction wherever used.				
635 PARAMOUNT. Finest Curled. See above.	.20	.45	1.35	12.50
637 PERFECTION. Early. Extra Fine Curled.	.20	.50	1.50	14.00
An excellent variety which grows more vigorously and rapidly than Paramount and has stems a little longer. The leaves are beautifully cut and curled, and uniform dark emerald green in color. Highly recommended.				
638 Plain, large flat leaves, not curled. Used for flavoring.	.15	.35	1.10	10.00

**Parsley for Roots**

633 HAMBURG (Heimisher). Parsnip Rooted. Selected Stock.	.15	.35	1.10	10.00
The roots are up to 8 in. long, parsnip-shaped, smooth and white. We have a very fine stock of this variety, which produces long, straight, thick roots.				

## PARSNIPS

*An ounce will sow  
150 feet of row. 2½ to 3 lbs. per acre.*

## 640 Harris' Model

**The Whitest Parsnips**

These are smooth, snow white, hollow crown parsnips, with a minimum of side roots or prongs. They are of good length, but not too long and their smoothness is quite remarkable, giving the roots a very attractive appearance so that they usually sell for top prices.

There is no better parsnip than "Harris' Model." Seed of our own growing from carefully selected transplanted roots.

Oz. 20c; ¼ lb. 55c; 1 lb. \$1.75; 10 lbs. \$16.00; 100 lbs. \$150.00.

## 642 Long Hollow Crown

Better than most stocks. Long smooth roots, not quite as uniform or white as Model.

Oz. 20c; ¼ lb. 50c; 1 lb. \$1.65; 10 lbs. \$15.00; 100 lbs. \$140.00.

Harris' Model Parsnips

## PEPPERS

*An ounce of seed will produce about 1000 plants.*

### Harris' Northern Grown Pepper Seed

If you want to make peppers a profitable crop here in the North, use Harris' Northern Grown Pepper Seed. We have specialized for over twenty years in growing peppers on our farm. Years ago we found out that the varieties which are usually grown in the long seasons and warmer climates farther south did not ripen enough fruit to make peppers profitable in the North. So we developed a number of *early, heavy bearing varieties*, which are suited to our conditions and will produce an abundance of ripe fruit wherever the seasons are short.

Harris' "King of the North" Peppers

*Note the large size and heavy yield.*

### 663 Harris' King of the North

*Very Large, Early and Prolific*

Since we introduced this variety in 1934, it has earned a reputation of producing greater yields of large peppers here in the North than any variety grown.

The plants are medium size, branching and literally covered with the immense fruit. The size and shape of the peppers is well shown in the photograph to the left.

The flesh is firm, mild and sweet. Harris Northern grown seed of this variety is by far the best strain obtainable. See prices on next page.

### 662 Harris' Improved Squash Pepper

*This pepper replaces the old type known as Squash, Cheese, Sunnybrook, etc.*

It is so early and prolific that it produces three times as many peppers as any other "Squash or Cheese" pepper which we have seen. This early character and high yield make it a profitable kind to grow even here in the north. The fruit is the true "Squash" shape, with very thick mild, sweet flesh. These peppers are also known as "Pimientos" and are used for canning whole in some sections. Seed of our own growing. See prices on next page.

### 656 Calwonder—Early (New)

*Large Early Fruits of California Wonder Type*

This variety ripens at least a week earlier than California Wonder and produces heavy crops of fine large blocky fruit of the same type as that variety. The peppers are 3 and 4 lobed, uniform, and the flesh is very thick.

The plants are dwarf and very sturdy and the fruit are easily picked without breaking the stalks. Big heavy peppers are produced in great abundance on these strong vines. Calwonder is well adapted for shorter seasons and is already very popular in New England and many other sections. See prices on next page.

### 652 California Wonder

*Large Fruit—Heavy Yields*

Ours is a remarkably superior stock of this fine pepper, which is so widely grown by market gardeners in all sections. The plants are of strong sturdy character and very prolific, bearing large crops of fine large peppers. The peppers are of the true California Wonder type, smooth and heavy, having very thick flesh. We are sure you will like this stock. See prices on next page.

### 670 Hot Portugal

*Large and Hot*

If you want lots of large, long *hot* peppers, grow this kind. The fruit is long, pointed and quite smooth for a pepper of this type. They normally average six inches or over in length and are borne profusely on the sturdy plant. This pepper is bright red when ripe and in addition to its large size, is just as hot as the old Giant Cayenne. Seed grown by us on our own farms. See prices on next page.

Harris' Wonder Peppers

**665 Harris' Wonder****Early-Prolific-Thick Meat**

Without sacrificing any of the earliness or heavy yields which have made this pepper the outstanding variety for the North, we have improved the size and uniformly fine shape by pure line selection. The fruit are even more uniform and handsome than before.

Harris' Wonder is a very smooth, thick fleshed California Wonder type which will give you not only enormous crops of green peppers but an abundance of ripe fruit before frost.

The peppers are large, chunky and beautiful dark green turning to rich red when ripe. They are very thick meated and the quality is excellent. A level bushel weighs over 30 lbs. See prices below.

	Oz.	¼ lb.	lb.
652 CALIFORNIA WONDER. Thick flesh. True Stock. See preceding page..	\$ .55	\$1.60	\$5.50
656 CALWONDER, EARLY. (New) See preceding page.....	.65	1.85	6.50
GIANT CAYENNE. (Hot).....	.....	.....	.....
We have discontinued this variety and recommend that our customers grow Heifer Horn which is the same type but larger, more uniform and yields better.			
660 HARRIS' EARLIEST. The Earliest Sweet Pepper.....	.60	1.75	6.00
Invaluable for the extreme northern sections where other peppers will not ripen. Small plants producing enormous yields of fruit, and earlier than any other kind.			
661 HARRIS' EARLY GIANT. The Earliest Large Pepper.....	.60	1.75	6.00
Popular early variety which we introduced. Ripens only a week later than Harris' Earliest yet has fine large tapering fruit about 4 in. long and 3½ in. across. Very prolific and valuable for short seasons. Seed of our own growing.			
662 HARRIS' IMPROVED SQUASH. See preceding page.....	.60	1.75	6.00
663 HARRIS' KING OF THE NORTH. See preceding page.....	.65	1.85	6.50
665 HARRIS' WONDER. Early—Thick Fleshed. See above.....	.65	1.85	6.50
668 HEIFER HORN. (Hot) Private Stock.....	.60	1.75	6.00
One of the largest and best hot peppers. This is a special market gardeners' stock.			
670 HOT PORTUGAL. Large Hot. See preceding page.....	.65	2.00	7.00
672 HUNGARIAN WAX. (Hot) Long Type.....	.60	1.75	6.00
The peppers are 4 to 4½ in. long by 1½ in. at the stem end and pointed. Waxy yellow when young, turning red when ripe. Very hot.			
674 Large Red Cherry. (Hot) Small Round Fruit. (Late).....	.60	1.75	6.00
676 OSHKOSH. The Largest and Best Yellow Pepper.....	.60	1.75	6.00
681 WORLDBEATER, EARLY STRAIN. (NEW). Large and Prolific.....	.65	1.85	6.50
This splendid new strain enables growers to get fine large Worldbeater peppers in Northern sections, as it ripens earlier than the regular stocks. The fruits are very large, long and thick fleshed; the vines are husky and remarkably prolific. A most uniform and attractive stock, which we recommend highly.			
680 WORLDBEATER. Regular Strain.....	.50	1.50	5.00
This is the same true stock which we have sold for many years. Will produce fine crops where the seasons are fairly long.			
679 WINDSOR "A." Early Thick Meated.....	.55	1.60	5.50
Long pointed shape with <i>very thick flesh</i> . Very prolific and produces an abundance of ripe fruit early. Peppers about 2½ in. at top and 4½ to 5 in. long.			

**PUMPKINS**

*An ounce of seed will plant 20 hills; about 3 lbs. to the acre.*

	Oz.	¼ lb.	lb.	10 lb.
686 CONNECTICUT FIELD or Big Tom.....	\$ .15	\$ .35	\$1.20	.....
The standard large pumpkin. True stock.				
688 Large Cheese.....	.15	.30	1.00	\$9.00

692 ORANGE WINTER LUXURY.....	.15	.45	1.30	12.00
This improved strain has netted deep orange skin and orange yellow flesh. A very uniform stock.				
695 SMALL SUGAR or Pie Pumpkin.....	.20	.45	1.35	.....
The most popular variety for market. Small round, deep orange and of excellent quality. Early and prolific.				

## RADISH

$\frac{1}{4}$  lb. of seed will sow about 300 ft. of row.

Early Scarlet  
Globe  
Long Island  
Strain.

### 715 Early Scarlet Globe

#### Long Island Strain

#### Medium Topped—Ideal for Outdoors

This excellent radish has become extremely popular among critical market growers in many sections because of its quick growth and uniformly fine type. It is a medium topped strain, and forms even solid bulbs of brilliant scarlet color with crisp white flesh. In general the shape is more rounded than Cavalier.

We believe our "Long Island Strain" is the best radish obtainable for outdoor sowing in most places, especially where the rounder shape is preferred. We also recommend it highly for greenhouse and frames where Early Scarlet Globe has been used. See prices below.

### 705 Cavalier

#### Short Top Scarlet Globe

The short tops, brilliant deep scarlet color, beautiful shape and extreme uniformity, and ability to stand a long time make this the best forcing type we have ever seen. These radishes are firm and solid, of the true olive shape and unusually uniform for type. It is often possible to pull practically 100% of number one radishes. It is also especially good on muck soils.

Growers everywhere are most enthusiastic over it and many of them tell us that these radishes sell for the best prices even when the market is slow. See prices below.

### 725 Icicle Radish (White)

#### Short-Topped Strain—

#### Also Called Pearl Forcing

This is an ideal stock of Icicle Radish, both for forcing and outdoors and it can also be grown successfully on muck. It is so much superior to ordinary stocks of Icicle that there is no comparison. The radishes are uniformly smooth and clear white. The tops do not grow too long in the greenhouses or frames, but are long enough for bunching when grown outdoors.

We have had a crop of our regular stock grown and are glad to tell our customers that we have a good supply of this fine true short-topped strain of Icicle radish. See prices on next page.

25 lbs. or more of any one variety will be supplied at the 100 lb. rate.

	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.
705 CAVALIER. Short Top Scarlet Globe. See above.....	\$ .40	\$1.25	\$12.00	\$115.00
707 COMET. Long Standing.....	.40	1.25	12.00	....
This fine round radish stands longer than any other kind. The bulbs are very attractive, round in shape with fine tap roots and brilliant scarlet in color. Recommended for outdoors and forcing.				
709 CRIMSON GIANT GLOBE.....	.30	1.00	9.00	....
Large globe radish for outdoor sowing. Bulbs attain a large size and are firm and mild.				
716 EARLY SCARLET GLOBE. Special Strain.....	.40	1.25	12.00	115.00
True olive shaped radishes, bright red in color, early, even maturing and uniform for type. Tops are good for bunching. An excellent variety for both forcing and outdoors.				
715 EARLY SCARLET GLOBE. Long Island Strain. See above. . .	.30	1.00	9.50	90.00

## RADISHES—Continued

	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.
710 <b>EARLIEST SCARLET WHITE-TIPPED. Forcing Strain</b> . . . . .	\$ .35	\$ 1.10	\$ 10.50	....
The radishes are round, brilliant scarlet with white bottoms. This is the finest strain of white-tipped radish, having small tops and is superior both for forcing and outdoor growing.				
725 <b>ICICLE or Pearl Forcing. Short-topped Strain.</b> See preceding page . . . . .	.35	1.20	11.50	\$110.00
734 <b>WHITE STRASBURG</b> . . . . .	.30	1.00	9.00	....
Large late white radish.				

## Winter Radishes

Sow in August and store in moist sand for winter.

701 <b>BLACK SPANISH TURNIP</b> . . . . .	.35	1.10	10.50	....
Roots are round or turnip shaped and grow very uniform in shape and size. Clear white flesh, skin deep black without white streaks.				

*"I would like to mention the wonderful success I had with my seeds from your farm. They really were the best I ever had from anywhere."*

Charles A. Beach, Monroe, N. Y. Mar. 9, 1943.

## RHUBARB or PIE PLANT

737 <b>Myatt's Linnaeus.</b> Early large stalks. This is a better strain of the common green rhubarb so widely grown. 1 oz. of seed will sow about 100 ft. of row. $\frac{1}{4}$ lb. 60c; lb. \$2.00; 10 lb. \$19.00.	
---	--

## MacDonald Rhubarb Roots

We have an exceptionally fine lot of roots of the now famous MacDonald Rhubarb. This variety is the most distinct improvement made in rhubarb in many years and is generally considered to be the best red rhubarb grown.

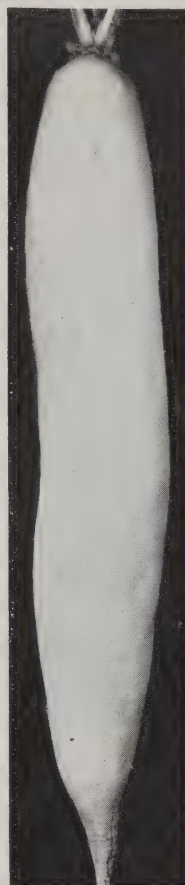

The plant is vigorous and strong, producing large tender stalks which are deep crimson in color. They make a very attractive bunch and when cooked the sauce is a beautiful deep pink and of excellent flavor. Market growers who have had these roots in the past find this rhubarb sells readily at the highest prices.

We have not succeeded in producing this variety from seed.

**Roots only—Strong divisions. 100 \$12.00; 1000 \$100.00.** Purchaser pays transportation. (Weight  $1\frac{1}{2}$  lbs. each.)

**Fordhook Giant Swiss Chard**  
*The best variety for market.*

**Icicle Radish**

## SALSIFY or Vegetable Oyster

*One ounce of seed will sow about 100 feet of row.*

740 <b>MAMMOTH SANDWICH ISLAND.</b> This is the largest and best variety, producing straight roots with but few side shoots. <i>Crop short.</i> $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.	
---	--

## SORREL

*One ounce of seed will sow about 250 feet of row.*

	$\frac{1}{4}$ lb.	lb.
743 <b>Improved Broad-Leaved</b> . . . . .	\$1.50	....
745 <b>NARROW LEAVED Special Strain</b> . . . . .	1.50	\$5.00
<i>This is the variety preferred by most growers.</i>		

## SWISS CHARD or Spinach Beet

$\frac{1}{4}$  lb. will sow about 250 ft. of row.

## 830 Fordhook Giant—Best for Market

This is the most popular variety. The leaves are large, thick, heavily crumpled and very dark green. The stems are broad, thick and white. A very uniform type. See prices below.

	$\frac{1}{4}$ lb.	lb.	10 lb.
830 <b>FORDHOOK GIANT.</b> See above. . . . .	\$ .65	\$2.00	\$18.00
834 <b>LUCULLUS. Large curly leaves.</b> . . . .	.55	1.75	16.50
<i>Leaves broad, heavily "Savoyed," light green in color. Stems long and white.</i>			
836 <b>SILVER LEAF. Smooth dark green leaf, white rib.</b> . . . . .	.55	1.75	16.50

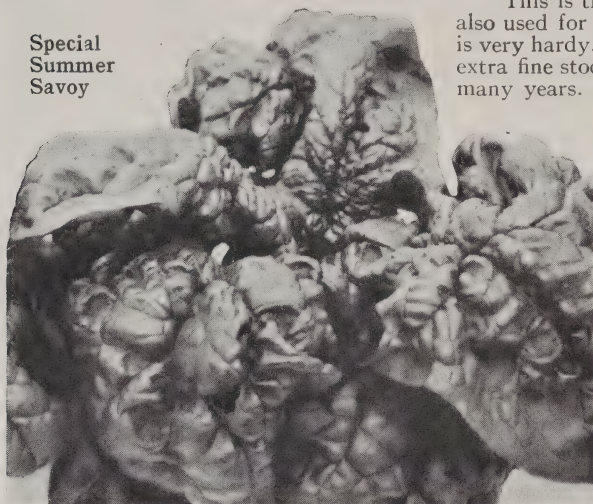

## SPINACH

*Sow about 12 to 20 lbs. of seed per acre in rows.*

### 765 Special Summer Savoy—Extra Selected—Long Standing

We highly recommend this remarkable strain of Long Standing Bloomsdale type, and we believe it is the best strain obtainable. Every plant is of the true type with large beautifully crumpled or "Savoyed" leaves; the color is a very attractive deep green and the spinach stands a long time without bolting to seed. Growers find that the yield per acre is consistently heavy.

Special  
Summer  
Savoy

This is the best kind for spring sowing and is also used for late fall sowing for spring crop as it is very hardy. We urge our customers to plant this extra fine stock which has been so satisfactory for many years. See prices below.

### 768 Viking

#### Early—Large Leaved—Long Standing

This spinach has proved to be a most excellent kind for spring sowing as it grows very rapidly and gets to cutting size early. It continues to grow a long time and produces immense plants without going to seed. The habit of growth resembles the old Nobel Giant Leaved; the leaves are large and broad, dark green in color and moderately well crumpled or blistered. Viking will produce extraordinary large crops of fine-looking spinach. See prices below.

*25 lbs. or more of any one variety supplied at 100 lb. rate.*

*Please write for prices on larger quantities than listed here.*

	lb.	10 lb.	100 lb.
750 BLIGHT RESISTANT SAVOY. For Fall Crop. See below . . . . .	\$.55	\$5.00	\$45.00
755 LONG STANDING BLOOMSDALE (For Spring sowing) . . . . .	.60	5.50	50.00
We have an exceptionally well bred strain. Large deep green, well crumpled leaves which produce enormous crops and stand a long time without bolting to seed. We recommend this stock.			
760 NORFOLK SAVOY (Reselected Bloomsdale) . . . . .	.55	5.00	45.00
A fine stock of this old favorite. Heavily crumpled dark green leaves. Used for early spring sowing, and in late fall for wintering over in many sections.			
762 OLD DOMINION. For Fall Crop. . . . .	.60	5.50	50.00
Very popular for spring sowing in places where blight affects spinach and also for early fall sowing as it is <i>blight resistant</i> and will stand longer without going to seed than Blight Resistant Savoy. The leaves are large, dark green, well blistered or "Savoyed," producing large crops which stand up well when shipped.			
765 SPECIAL SUMMER SAVOY. See above. . . . .	.60	5.50	50.00
768 VIKING. Large Leaved—Long Standing. See above. . . . .	.70	6.50	60.00

### 750 Blight Resistant Savoy

#### Best for Fall Crops

We have an exceptionally good stock of this popular variety. It is the true Virginia Strain, practically 100% resistant to blight and can be depended on to produce large crops in the fall where other varieties blight and fail entirely. (See photo.) The type is excellent with dark green well crumpled leaves and the yields are very heavy.

Blight Resistant Savoy does not stand as well as some other kinds in the spring, although our strain will stand three to four days longer than most strains of this variety. See prices above.

Blight Resistant Savoy—Stands up in fall.

## SUMMER SQUASH

$\frac{1}{4}$  lb. of seed will plant about 100 hills; 5 to 6 lbs. of seed per acre.

### 825 Yankee Hybrid (New)

#### *Enormous Early Yields*

On our farm Yankee Hybrid has proved to be not only several days earlier than the next best variety but the first picking averages more than twice as many marketable fruit, and the total yield is greater.

The squash are of the finest type, extremely uniform and with straight thick necks. The skin is slightly roughened and of a glowing waxy yellow color that makes them very attractive. There is practically no green color even when very young.

We offer only first generation Hybrid seed, grown directly from pure line inbreds. This is a difficult process but is essential to get the maximum earliness, vigor and uniformity. See prices below.

**Yankee Hybrid Squash**

*Checking an early picking in our trials.*

### 795 Harris' Improved Cocozelle—(New) Long Slender Straight Fruit

This is the long, slender, straight type of Cocozelle which critical squash growers have long been looking for. Developed and grown entirely by us on our own farm, this new strain will produce longer, more slender and more uniform fruits than any other strain of Italian Vegetable Marrow or Cocozelle, and makes a very fancy pack. The squash are even throughout the length and carry the desired dark green base color with stripes of lighter green. The plants are of the true bush type and very prolific. Be sure to grow this new kind. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
<b>782 Early Giant Crookneck</b> .....	\$ .15	\$ .45	\$ 1.50	\$ 13.50
Larger than the old Bush Crookneck and equally early. True strain.				
<b>785 EARLY YELLOW PROLIFIC.</b> See below.....	.20	.55	1.75	15.00
<b>788 GIANT SUMMER STRAIGHTNECK. Butter Yellow</b> .....	.20	.55	1.75	15.00
Without any trace of green even when young, this popular strain fills the demand for a large summer squash of clear butter yellow color. The fruits are smooth, bright and attractive. The vines are large and prolific.				
<b>795 HARRIS' IMPROVED COCOZELLE. (New)</b> See above.....	.25	.70	2.25	21.00
<b>803 ITALIAN VEGETABLE MARROW. (Cocozelle)</b> .....	.20	.55	1.75	15.00
This is the same stock which we have sold for years. Produces mottled dark green fruit of good length. Bush vines.				
<b>807 MAMMOTH WHITE BUSH SCALLOP. Also called "Cymling"</b> .....	.15	.45	1.40	12.50
The popular type, producing large yields of thick creamy white, well scalloped fruit. Bush vines.				
<b>825 YANKEE HYBRID. Remarkable New Early Straightneck.</b> See above.....	.50	1.50	5.00	45.00
<b>776 DARK GREEN ZUCCHINI. Special Long Strain</b> .....	.20	.60	2.00	17.50
This is a very superior strain with uniformly long dark green fruit, entirely without light grey fruit or light stripes. Exactly what is wanted.				

**Early Yellow Prolific Squash**

*These handsome fruit bring top prices.*

### 785 Early Yellow Prolific

#### *Uniform and Attractive*

This is now definitely established as one of the finest and most popular varieties. The fruit is not as large as the Giant Straightneck varieties, but they are borne in great profusion on the dwarf vines. These squash are very uniform for shape and size and are remarkable for their smooth skin and clear bright yellow color, having no trace of green even when very young.

We have grown a fine crop of seed on our own farm and can assure our customers that no better stock of this variety can be obtained. See prices above.

## WINTER SQUASH

$\frac{1}{4}$  lb. of seed will plant 50 hills; 3 to 4 lbs. of seed per acre.

### 770 Blue Hubbard

#### *Harris' Famous Selected Strain*

This is the popular large, rugged strain that produces big yields of the finest squash, bringing top prices. It is the result of years of careful breeding and is considered to be the finest, purest stock grown.

Harris' Blue Hubbard can be relied on to produce immense yields of large well shaped squash (see photograph). The seed we sell is all of our own growing and cannot be obtained elsewhere.

Although this was originally strictly a New England variety, the fine quality, enormous yields and excellent keeping quality have made this a most valuable kind for all markets. See prices below.

**Harris' Blue Hubbard Squash**

*Part of our fine seed crop.*

### 810 Quality—*The Richest Small Market Squash—See photo on back cover*

Quality squash cannot be excelled to meet the ever increasing demand for a small to medium size squash of superior quality at roadside stands and markets.

The squash are dark olive green in color, 7 to 9 inches in diameter, and of an attractive heart shape. The flesh is firm, thick and of the finest quality, being dry and sweet. Once they try it customers always come back for more of this kind.

It is our candid opinion that if you do not grow this kind you are missing a good thing.

**Seed of our own growing.** See prices below.

### 823 Warren Squash—Improved Essex Hybrid (*New England Strain*)

This fine old New England squash has become popular in many sections which formerly would not use "orange or red" squash. Our stock of this type has proved more than satisfactory.

The squash are early, medium size, very uniform in shape and heavily warted. We have bred this strain with a well formed but not too prominent "button." The flesh is fine grained, extra thick and the color a beautiful deep orange red. **Seed of our own growing.** See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
770 BLUE HUBBARD. Selected Strain. See above. . . . .	\$ .40	\$1.10	\$3.25	\$30.00
772 Boston Marrow. . . . .	.20	.45	1.50	14.00
Popular fall squash, deep orange color. Used principally for canning and pies.				
773 BUTTERCUP. . . . .	.35	1.00	3.00	27.50
This fine small squash has excellent quality and exceptionally thick sweet flesh and has become very popular for roadside stands and local markets. The shape is rather flat with a distinctive "button." Highly recommended where quality counts.				
780 DELICIOUS. . . . .	.25	.75	2.50	22.50
Smaller than Hubbard, but of finer quality, deeper green shell with orange flesh. Dry and sweet. We have an excellent true stock.				
792 GOLDEN DELICIOUS. . . . .	.25	.70	2.25	21.00
An excellent small orange squash for roadside and market. Superb quality.				
793 Golden Hubbard. . . . .	.25	.70	2.25	21.00
The same shape as Hubbard but with deep orange yellow skin.				
797 HUBBARD—True. . . . .	.25	.75	2.50	22.50
Dark green smooth skin, fruit of high quality. We have a fine true strain.				
800 IMPROVED WARTED HUBBARD. (Dark Green). . . . .	.30	.85	2.75	25.00
Larger, more warted, and darker green than the true Hubbard squash. An excellent stock that will produce large crops of the finest squash.				
810 QUALITY. See above. . . . .	.35	1.00	3.00	27.50
815 ROYAL ACORN or Mammoth Table Queen. (New). . . . .	.20	.65	2.10	19.00
This new strain meets the growing demand for a squash shaped like the popular Table Queen but of larger size. The fruit measure about 6-7 in. long and 5 in. in diameter. Very uniform type, with attractive dark green color and fine quality. Try some Royal Acorn this year.				
820 TABLE QUEEN. Also called Acorn and Des Moines. . . . .	.20	.60	2.00	18.50
The Individual Squash. Small dark green fruit 5 to 6 in. long $4\frac{1}{2}$ in. in diameter, deeply ribbed and very hard. We have a fine true stock of this popular variety.				
823 WARREN. Improved Essex Hybrid. See above. . . . .	.30	.85	2.75	25.00

## TOMATOES

*An ounce of seed will produce about 2000 plants.*

### **Harris' New York State Certified Tomato Seed**

For eight successive years we have offered New York State Certified Tomato seed of our own growing. This seed must meet the *highest* standard of purity and freedom from disease.

Most of the tomato seed sold today is a by-product from fruit which has been processed in canning factories for the juice. Our Certified Tomato Seed is all grown on our own farms *for seed only*. Our seed crops are grown 100% from hot water treated stock seed and the seed is all saved by the fermentation process; reducing seed borne diseases, such as early blight, to a minimum.

### **890 Victor**

#### ***The New Extra Early Tomato***

At the time when the old extra early varieties have but one or two ripe fruits, Victor produces large clusters of beautiful tomatoes ripening all at once.

The tomatoes are of good size, smooth and solid. Having a characteristic light color when green, they turn quickly to a brilliant scarlet color all over. There are no green spots on Victor.

The vine is a sturdy determinate type, that can be planted close together (2 x 3 ft. is recommended) and thus have more early fruit per acre. If you want extra early tomatoes, grow Victor.

**N. Y. State Certified Seed** of our own growing. See prices on page 33.

**Victor**—An early cluster in our seed crop.

### **885 Rutgers—Harris' Northern Grown Strain**

*See photo on front cover*

In our opinion Rutgers is the finest main crop tomato grown today. It combines large size, solid structure, fine flavor and a beautiful rich red color that goes all through the fruit, making it excellent for both market and canning. The vines are large and very husky and stand up well even late in the season; they bear tremendous crops of fine heavy fruit.

Our strain has been grown and selected here in the North for years and has proved to be the best strain obtainable. The earliness and yield, the uniformly large size and smooth even shape of the fruit have all been improved as a result of careful breeding on our farm ever since this fine variety was introduced. **N. Y. State Certified Seed** of our own growing. See prices on page 33.

### **889 Valiant—(New) Large Fruited Early Type**

This new variety has now taken the place of the old Earliana in many sections. It ripens three or four days later but has so much larger and finer fruit that this difference is usually not important. The fruit is smooth, deep, nearly round in shape and of good interior structure; it colors up much better than Earliana, and the early yields are very heavy.

The vines are of spreading habit of growth and do best when well fertilized and grown on fairly heavy soil. Valiant has already proved to be a most popular and profitable variety for early market. See prices on page 33.

**Stokesdale**

### **888 Stokesdale**

#### ***Heavy Yielding Medium Early Type***

Ripening at the same time as John Baer, this excellent variety has proved to be well adapted for market, shipping and canning. The fruit is medium sized, with a very uniform smooth, deep globe shape, bright scarlet color and fine quality. The fruit ripens evenly and is very free of cracks and blemishes.

The yields are extremely heavy and the vines are strong and vigorous, making it one of the most dependable kinds to grow. Our strain is by far the best obtainable and we offer only **N. Y. State Certified Seed** of our own growing. See prices on page 33.

## 867 John Baer—Improved Strain

### *The Best Tomato in Its Class*

This is the **Geneva** strain of John Baer and will produce larger fruit and more tons of fine tomatoes to the acre than any strain we have ever seen. The fruit is unusually large for this variety. It is very smooth and deep red throughout, coloring right up to the stem. The vines are vigorous and healthy and produce heavy crops.

We regard this Improved John Baer as one of the best medium early tomatoes, and can recommend it most highly both for market and canning.

**N. Y. State Certified Seed** of our own growing. See prices below.

Marglobe

## 872 Pan American

*An excellent new main crop variety*

Developed by the United States Department of Agriculture as a Marglobe type with *complete resistance to fusarium wilt*, this fine new variety has proved highly promising. The fruit carry the fine deep globe shape of Marglobe, and are so very uniform that we found practically no small tomatoes on the vines even late in the season. They are of fine quality, bright scarlet in color and ripen evenly to the stem. The flesh is solid, meaty and exceptionally firm.

Pan American is a main crop variety, ripening with us at about the same season as Marglobe and Rutgers. The large robust plants carry enormous yields of fine fruit, which holds up extremely well late in the season.

**N. Y. State Certified Seed** of our own growing. See prices on page 33.

## 870 Marglobe Tomato—Blight Resistant

The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. Widely grown for market and canning, this is also a standard variety for green pack, as it grows with little stem crack and ripens well in storage. The vines are vigorous and healthy and do not blight, remaining green until frost, so the late fruit is as good as the first to ripen.

This is our own strain which we have grown on our farms for many years and carefully selected for yield and uniformity of color, size and shape of fruit.

**N. Y. State Certified Seed** of our own growing. See prices on page 33.

## 853 Comet Tomato—For Greenhouse and Trellis Growing

Our stock is used regularly by some of the largest and best growers of greenhouse and trellis tomatoes, where a medium size fruit is wanted. We are pleased to offer **N. Y. State Certified Seed** of this fine strain of **Comet Tomato**. The seed is saved only from the best fruit on trellis grown plants and has been found superior for both greenhouse use and growing outside on supports.

Pkt. 20c;  $\frac{1}{8}$  oz. 50c;  $\frac{1}{4}$  oz. 90c;  $\frac{1}{2}$  oz. \$1.65; oz. \$3.00;  $\frac{1}{4}$  lb. \$10.00.

## Small Fruited Tomatoes

Popular to use in pickles, salads and preserves.

Varieties: 879 Red Cherry, 881 Red Pear, 882 Red Plum, 893 Yellow Cherry, 894 Yellow Pear, 895 Yellow Plum, 863 Ground Cherry (Husk).

Pkt. 15c;  $\frac{1}{2}$  oz. 40c; oz. 65c;  $\frac{1}{4}$  lb. \$2.00. Any three Pkts. 35c. Any three  $\frac{1}{2}$  oz. \$1.00.

## TURNIPS

*It requires 1 to 1½ lbs. of seed per acre in drills, or 2 to 2½ lbs. broadcast.*

## 920 Purple Top White Globe—Special Strain

This stock of Purple Top White Globe turnip continues to produce the smoothest, hand-somest turnips we have ever seen. The turnips are a snowy white with bright purple tops and the shape is smooth and round. This strain is very uniform and all the turnips are of the finest type.

It costs no more to grow these fine turnips, and their attractive appearance makes them sell much better on the market. See prices below.

	$\frac{1}{4}$ lb.	lb.	10 lb.
902 EARLY WHITE MILAN. The Earliest Turnip..... Very early, flat white turnip.	\$ .45	\$1.45	....
906 GOLDEN BALL. The Smoothest Yellow Turnip..... Round, smooth yellow. Much the best to grow where a yellow turnip is wanted.	.....	Crop Failed....	....
920 PURPLE TOP WHITE GLOBE. Special Strain. See above.....	.45	1.45	\$14.00
928 SHOGOIN. The Best Foliage Variety..... The best turnip for greens, very much superior to Seven Top. The turnips are white, flat and of fine quality. The tops are light green of good quality and grow in clusters.	.50	1.60	....

## RUTA BAGAS

## 910 Improved Long Island

*The Best Yellow Ruta Baga  
for Market and Storage*

This fine purple top ruta бага is now the standard all purpose variety and we offer an excellent strain. The roots are large, globe shape, smooth and without too much neck. They are colored purple above the soil level and yellow below; the flesh is light yellow, firm, fine-grained and sweet. The yields with this strain are very heavy.

$\frac{1}{4}$  lb. 50c; lb. \$1.55; 10 lb. \$15.00.

## 915 Macomber—Finest Quality

An excellent white ruta бага of fine quality. The flesh is creamy white, very fine grained and exceptionally mild and sweet. Roots nearly round, white with green tops.

$\frac{1}{4}$  lb. 60c; lb. \$2.00; 10 lb. \$19.00.

Long Island Improved Ruta Bagas

## VEGETABLE PLANTS

Orders for plants will be entered at any time. The plants will be sent when ready, or if ordered for specific dates as near the date as possible. However if you do not receive them promptly, please do not write. They will be shipped as soon as we can get them out. Orders are filled according to date received.

**PLEASE NOTE:** Our plants are expertly and carefully packed so that they should reach you in good condition, but if they are delayed on the road or for any other reason, they arrive in poor shape, let us know at once and proper adjustment will be made. We cannot be responsible for the plants living after they are planted as this depends on how they are planted and the soil and weather conditions over which we have no control.

A Greenhouse of Early Cabbage on Moreton Farm

*Except where noted, the plants are sent at the expense of the purchaser.*

If plants are wanted by parcel post an extra charge is made for postage as follows: To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb.

**No plants sent C.O.D.**

**Note:** Both mail and express are now handled much more slowly than before and we do not recommend ordering tender plants for long distance shipment.

**CABBAGE PLANTS.** Early transplanted plants, ready April 15 to May 15. Well hardened in cold frames and will stand considerable frost. Golden Acre only. Weight 500-14 lbs., 1000-25 lbs. . . . . **Not prepaid 500 plants \$6.50, 1000 \$12.00.**

**CAULIFLOWER.** Early transplanted plants, ready from April 25 to May 15. Snowball only. Weight 500-14 lbs., 1000-25 lbs. . . . . **Not prepaid 500 plants \$7.50, 1000 \$14.00.**

Field grown plants, ready June 20. Snowball only. Weight 500-20 lbs., 1000-40 lbs. . . . . **Not prepaid 500 plants \$3.50, 1000 \$6.00.**

**EGG PLANT.** Potted plants, ready about May 15th. Black Beauty only. Grown and shipped in No. 2½ "Fertile Pots." Weight 100 plants 75 lbs. . . . . **Not prepaid 100 plants \$8.00.**

**ONION PLANTS.** Ready about April 15th, not sent later than May 25th. Sweet Spanish (Utah Strain) only. Please see page 21. Weight about 30 lbs. per crate.

10 bunches \$3.00 prepaid. **Not prepaid Full Crate (60 bunches) \$10.00.**

**PEPPERS.** Strong transplanted plants, ready middle of May. Harris' Wonder, Harris' King of the North, Harris' Earliest and Hot Portugal. Weight 500-14 lbs., 1000-25 lbs.

**Not prepaid 500 plants \$8.00, 1000 \$15.00.**

**PEPPERS.** Untransplanted Plants. Same varieties as named above. These plants should be grown in frames until large enough to plant in the open ground. Ready April 15 to May 15.

**500 plants \$3.00, 1000 \$5.00 transportation paid.**

**MUSKMELON.** Potted plants, ready about May 25th. Varieties: Delicious and Bender's Surprise. Grown and shipped in No. 2½ "Fertile Pots." Weight 100 plants 75 lbs.

**Not prepaid 100 plants \$8.00.**

**WATERMELON.** Potted plants, ready about May 25th. Dixie Queen only. Grown and shipped in No. 2½ "Fertile Pots." Weight 100 plants 75 lbs. . . . . **Not prepaid 100 plants \$8.00.**

**TOMATOES.** Strong Transplanted Plants, ready about May 15th. Varieties: Victor, John Baer, Bonny Best, Pritchard's Scarlet Topper, Rutgers, Weight 500-18 lbs., 1000-30 lbs.

**Not prepaid 500 plants \$8.00, 1000 \$15.00.**

**TOMATOES.** Untransplanted Plants. Varieties: Victor, John Baer, Bonny Best, Pritchard's Scarlet Topper, Rutgers. Sturdy plants, grown especially for seedlings from seed sown very thinly. They should be set in frames and allowed to grow for two weeks or more before setting in the field. Strong seedlings 3 to 4 in. high. Ready April 10 to May 15.

**500 plants \$3.00, 1000 \$5.00 transportation paid.**

**TOMATOES.** Potted Plants. Grown and shipped in No. 2½ "Fertile Pots." Varieties: Victor, John Baer, Bonny Best, and Rutgers. Weight 100 plants 70 lbs.

**Not prepaid 100 plants \$7.50.**

250 or more plants are furnished at the 500 rate; 750 or more at the 1000 rate; For prices on quantities less than listed here see our general catalog.

## ROOTS, ETC.

**ASPARAGUS. Mary Washington.** The quality of the roots is of utmost importance in starting an asparagus bed. When you buy from us you can be sure of getting roots of the true strain, freshly dug, carefully sorted and superior in every way.

**1 yr. roots** (weight 500-35 lbs., 1000-70 lbs.) **Not prepaid 500 roots \$5.50, 1000 \$10.00.**

**2 yr. roots** (weight 500-50 lbs., 1000-100 lbs.) **Not prepaid 500 roots \$8.00, 1000 \$15.00.**

**HORSE RADISH. Maliner-Kren.** The standard variety we have sold for years.

**500 sets \$5.50, 1000 \$10.00 transportation paid.**

**RHUBARB ROOTS. MacDonald.** Sturdy root divisions. See page 27. (Weight 1½ lbs. each)

**Not prepaid 100 roots \$12.00, 1000 \$100.00.**

## STRAWBERRIES, RASPBERRIES, ETC.

A limited quantity of strawberry and raspberry plants and grape vines will be available. For varieties and prices, please see our general catalog published in January.

## Certified Seed Potatoes

All potatoes are strictly net cash with order. No cash discount is allowed and full remittance must accompany order as they cannot be charged or sent C.O.D.

Potatoes are offered f.o.b. Coldwater, N. Y. and purchaser pays all transportation charges.

The potatoes are shipped in sacks holding 100 pounds. We can usually ship safely by the 25th of March, but not before as the potatoes are kept in storage until that time.

We expect to have the following varieties for 1944:

<b>CHIPPEWA. Early</b> .....	} For prices please see our general catalog published in January
<b>GOLDEN RURAL or RURAL RUSSET</b> .....	
<b>GREEN MOUNTAIN</b> .....	
<b>IRISH COBBLER. Early</b> .....	
<b>KATAHDIN</b> .....	

## HARRIS' FARM AND FIELD SEEDS

All farm and field seeds, field corn, grass seeds, etc. are strictly net cash with order at prices quoted. No cash discount is allowed and full remittance must accompany order, as they cannot be charged or sent C.O.D.

All farm, field and grass seeds are offered f.o.b. Coldwater, N. Y. and purchaser pays all transportation charges. We do not charge for bags.

### Seed Grain

In New York State last spring, the weather was so wet that few growers were able to plant oats or barley until very late and crops were very poor. As a result there is practically no certified seed of these grains available. Under these circumstances, the N. Y. State College of Agriculture has pointed out that growers will have to use Western grown oats and barley and we are offering two of the best varieties for New York State, which they recommend.

	<u>NOT PREPAID</u>	
	Sack	5 Sacks
<b>ALPHA BARLEY.</b> (48 lbs. per bu.) .....	Crop Failed	
<b>HANNCHEN BARLEY.</b> (48 lbs. per bu.) .....	Sack 2½ bu.	\$7.25 \$35.00
This is a two row barley, very closely resembling Alpha in type and growth. The straw is not quite as stiff and the yields are slightly lower, but it is good heavy-producing type which has done very well in New York State.		
<b>CORNELLIAN OATS.</b> (32 lbs. per bu.) .....	Crop Failed	
<b>LENROC OATS.</b> (32 lbs. per bu.) .....	Crop Failed	
<b>VANGUARD OATS.</b> (32 lbs. per bu.) .....	Sack 3 bu.	6.75 33.00
This variety is widely grown in Ontario, Canada and is well adapted to New York State conditions. It is midseason oat, resistant to stem rust and produces very good yields. The growth is tall with a fairly stiff straw.		
<b>JAPANESE BUCKWHEAT.</b> (48 lbs. per bu.) .....	Sack 2 bu.	5.00 24.50
We have good supplies and a very fine lot of seed to offer this year.		

**FARM and FIELD SEEDS—Continued on next page**

RED TOP. (Finest re-cleaned.) (32 lbs. per bu.).....		\$4.50 \$10.50	3.00 7.00

## Lawn Grass Seed

HARRIS' SUPERFINE. The finest all purpose lawn grass mixture. Contains Wild White Clover.  
10 Lbs. \$6.50; 25 Lbs. \$15.00; 50 Lbs. \$29.50; 100 Lbs. \$58.00 transportation paid.

GRASS SEED FOR SHADY LAWNs. A special mixture of grasses adapted to shady spots.  
10 Lbs. \$8.50; 25 Lbs. \$21.00; 50 Lbs. \$40.00 transportation paid.

See our General Catalog for description of these and other fine lawn grass mixtures.

For Better Crops and Improving Your Soil

Inoculate Alfalfa, Clover, Peas, Vetch, Soy Beans, etc. with NITRAGIN.

See page 48

# FLOWER SEEDS

FOR FLORISTS AND PLANT GROWERS WHO WANT THE BEST

Now that the Victory Gardeners have a year of experience behind them, they are going to realize that flowers can't be neglected entirely. Many of them are going to plant "flowers for morale" in their vegetable gardens. Be ready for them by having plants of the easy to grow annuals and perennials for sale. We know your greenhouse and hot bed space is going to be taxed to the limit, so make every inch of space count. Plant seed that is true to name, that germinates well, that grows well. Our seed has an enviable record of past performance. Thousands of customers of many years standing will testify that you can't go wrong if you plant Harris Seed.

Remember too that now, as never before, the wholesale markets can use good outdoor grown cut flowers: Bachelor Button and Larkspur can be sown in the fall. Unwin Dahlias, Marigolds and Snapdragons and Asters had best be started indoors but Gaillardia and Zinnias may be sown directly in the field in May and Calendulas in late June for large, well formed, long stemmed flowers in the fall.

*For terms see inside front cover.*

## Harris' ASTERS

The work that has been done on this crop by our experiment stations and individual florists puts the aster in top place as a paying crop. Breeding for resistance to some diseases is a great step forward. The use of lights on transplants to hasten flowering and of cloth houses to keep out insects which spread "yellows" are proving invaluable aids in successful production of this universally favorite flower. Asters rank next in importance to Gladiolus as cut flowers and should be included in every planting.

### New Wilt-Resistant Asters

#### Harris' 8-Best Mixture

W1500—If you grow plants for sale or cut flowers for a discriminating retail trade here is a mixture that will assure you of repeat orders. We use equal quantities of the following eight best wilt resistant varieties. Lg. Pkt. 15c; ¼ Oz. 35c; Oz. \$1.30; ¼ Lb. \$4.00.

Crego Shell Pink	Early Giant Light Blue
Crego Deep Rose	Early Giant Peach Blossom
Peerless Pink	Am. Branching Purple
Heart of France	Am. Branching White

#### New Early Giant

Earliness, resistance to wilt, large size, graceful form add up to just about the perfect aster.

W1824—Light Blue.....	Lg.	Pkt.	¼ Oz.	Oz.
W1823—Peach Blossom.....	\$ .35	\$ .85	\$3.00	
W1822—Rose Marie. Bright rose..				

#### Heart of France Aster

W1078—The most popular "red" Aster and still a favorite for the gardens. There is no other Aster to take its place. Lg. Pkt. 25c; ¼ Oz. 70c; Oz. \$2.00.

#### American Branching Asters

The leading mid-season variety for all purposes.

W1604—Azure Blue.....	Lg.	Pkt.	¼ Oz.	Oz.
W1606—Crimson.....				
W1602—Flesh Pink.....				
W1607—Peach Blossom.....	\$ .20	\$ .45	\$1.40	
W1605—Purple.....				
W1603—Rose.....				
W1601—White.....				
W1600—Variety Mixture.....	.15	.40	1.20	

#### Royal Asters

Same form as American Branching but a little earlier.

W1301—White.....	Lg.	Pkt.	¼ Oz.	Oz.
W1303—Rose.....				
W1304—Lavender.....	\$ .20	\$ .45	\$1.40	
W1305—Purple.....				
W1300—Variety Mixture. A properly proportioned mixture of our own.	Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.			

#### Peerless Pink Aster

W1066—This is still the most popular light pink Aster. Large double flowers on vigorous plants. Lg. Pkt. 20c; ¼ Oz. 45c; Oz. \$1.40.

*"I want to tell you about the Asters I received from you last year—I actually had Aster plants 4½ ft. tall with stems 2 to 2½ ft. long. My seed in the future will be from your company."*

*Harry V. D. Giles, Birmingham, Mich.*

**Peerless Pink**  
Very popular light pink.

## Non Wilt-Resistant Varieties

### Sunshine Asters

**W1010—New California Sunshine, Mixed Colors.** A better mixture of tall growing Asters with large single flowers, many with quilled centers. This is an extra special mixture we make by using fresh, new crop seed. **Lg. Pkt. 30c; ¼ Oz. 85c; Oz. \$2.75.**

### Ageratum

Continues to be one of the most popular edging plants. The following varieties were outstanding in our trials.

**W2012—Midget Blue.** Very dwarf, only 5 to 6 inches tall with clear blue flowers standing well above the foliage. **Lg. Pkt. 45c; ½ Oz. \$1.00; ¼ Oz. \$1.70; Oz. \$5.00.**

**W2013—Blue Bedder.** One of the finest varieties from seed since it produces such large flower clusters on uniformly dwarf plants. **Lg. Pkt. 50c; ½ Oz. 95c; ¼ Oz. \$1.75; Oz. \$5.00.**

**W2014—Blue Ball.** Growing 6 to 10 inches tall this variety is ideal for window boxes as well as borders. **Lg. Pkt. 25c; ½ Oz. 40c; ¼ Oz. 70c; Oz. \$2.50.**

### Alyssum

**W2020—Sweet.** 1 ft. .... ¼ Oz. Oz. ¼ Lb. \$ .15 \$ .40 \$1.00  
**W2021—Little Gem.** 8 in. .... .20 .60 1.60  
**W2022—Carpet of Snow.** 5 in. .... .25 .75 1.90  
**W2023—Violet Queen (New)** Much deeper color than Lilac Queen. Seedlings sell well. ¼ Oz. 40c; Oz. \$1.25; ¼ Lb. \$3.75.

### Anchusa

**W2041—Blue Bird.** Forget-me-not blue flowers on 18 to 24 stems. ¼ Oz. 20c; Oz. 50c.

## Queen of the Market

Still the best early variety available at this time. Comes into bloom in early August.

	Lg. Pkt.	¼ Oz.	Oz.
<b>W1205—Purple</b> .....	\$ .20	.45	\$1.40
<b>W1204—Lavender</b> .....			
<b>W1203—Rose</b> .....			
<b>W1201—White</b> .....			
<b>W1200—Variety Mixture</b> .....	.15	.40	1.20

## Crego Asters

Also called "Ostrich Feather" Asters. Large flowers with long twisted petals. We have selected the five best colors.

W1402—Shell Pink.....	}	Lg.		
W1404—Azure Blue.....		Pkt.	¼ Oz.	Oz.
W1405—Purple.....		\$ .20	\$.45	\$1.40
W1403—Deep Rose.....				
W1401—White.....				
W1400—Variety Mixture. Our own mixture of fresh seed of the above kinds. Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.				

### California Giant Asters

**W1810—Mixed Colors.** Immense flowers of the graceful shaggy type borne on long stems. In areas where wilt is not prevalent and where the growing season extends into late September, the California Giants are supreme. **Lg. Pkt. 25c; ¼ Oz. 65c; Oz. \$2.25.**

## Arctotis

**W2085—Grandis.** Daisy like flowers; petals silvery white with lavender reverse; deep blue center. ¼ Oz. 30c; Oz. \$1.00.

## Asparagus

	100 seeds	1000 seeds
<b>W2090—Plumosus Nanus</b> .....	\$ .60	\$5.00
<b>W2091—Sprengeri</b> .....	.40	3.00

## BALSAM

**W2110—Brilliant Mixture.** Large double Camellia like flowers on plants almost a ft. high. ¼ Oz. 25c; Oz. 75c.

## Browallia

**W2184—Elata.** Few flowers have such a true blue color. Easily grown in full sun. **Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.30.**

## Candytuft

	¼ Oz.	Oz.	¼ Lb.
<b>W2271—White</b> .....	\$ .20	.60	\$1.80
<b>W2272—Rose</b> .....			
<b>W2274—Flesh Pink</b> .....			
<b>W2276—Lavender</b> .....			
<b>W2270—Rainbow Mixture</b> .....			
<b>W2275—Hyacinth flowered White</b> .....	.15	.40	1.20
	.25	.75	2.25

## Calendula

This crop pays dividends if planted in late June to mature in September and October. The flowers escape injury from leaf hoppers and tarnished plant bugs and develop into large, well formed blooms comparing favorably with greenhouse grown stock.

	¼ Oz.	Oz.	¼ Lb.
W2201—ORANGE KING, Improved.	\$ .50	\$1.50	
W2202—LEMON QUEEN	.50	1.50	
W2204—APRICOT QUEEN	\$ .30	1.00	3.00
W2208—CHRYSANTHA	.50	1.50	
W2214—CAMPFIRE	.30	1.00	3.00
W2206—ORANGE FANTASY	.50	1.50	
W2205—BALL'S ORANGE	.30	1.00	3.00
W2207—BALL'S GOLD	.30	1.00	3.00
W2215—LARGE FLOWERED MIXTURE	.35	1.00	

## Carnation

### Giant Double Chabaud

This has always been a good variety to sow for plant sales. Sown indoors very early and grown cool the plants will find a ready sale.

	Lg. Pkt.	¼ Oz.	Oz.
W2290—Mixed Colors. An extra good strain of large flowers.	\$ .25	.65	\$2.25

## Castor Bean

W2500—Tropical Mixture. Oz. 25c; ¼Lb. 75c.

## Celosia

	Lg. Pkt.	¼ Oz.	Oz.
Feathered Cockscomb			
W2370—Plumosa, Mixed Colors.	\$ .15	.40	\$1.20
W2377—Golden Feather ( <i>Dwarf</i> )	.65	2.00	

### Crested Cockscomb (*Cristata*)

W2380—Mixed Colors.	.20	.45	1.50
---------------------	-----	-----	------

## Centaurea

### Cyanus (Bachelor Button)

W2325—Double Blue Florist's Strain. A very fine strain of the tall double bright blue used by florists for cut flowers. Try a fall sowing for early summer cutting. ¼ Oz. 15c; Oz. 45c; ¼ Lb. \$1.35.

	¼ Oz.	Oz.	¼ Lb.
W2321—Double White			
W2322—Double Rose	\$ .15	.45	\$1.35
W2324—Double Ruby			
W2320—COLOR MIXTURE	.15	.40	1.20
W2332—JUBILEE GEM ( <i>New</i> ).			
Dwarf	.35	1.00	3.00

W2350—Gymnocarpa. Heaviest and most rapid grower of the Dusty Millers. Showy in window boxes and for contrast in beds and borders. ¼ Oz. 15c; Oz. 45c; ¼ Lb. \$1.35.

## Chrysanthemum (Annual)

W2400—Mixed Colors. Single daisy-like flowers with striking color combinations. Hold up very long as cut flower. A small section of a greenhouse bench planted to them pays dividends. Good cut flower outdoors too. ¼ Oz. 15c; Oz. 40c.

## Clarkia

W2420—Sunrise Mixture. Grown best in the greenhouse in flats which can be moved around if necessary. Perfect filler for mixed bouquets and should be grown more. Lg. Pkt. 15c; ¼ Oz. 30c; Oz. \$1.00.

## Cleome (Spider Plant)

W2416—Pink Queen. Grow a few plants of these for spring sales. Continuous bloom from July 'till frost. Grows 3½ to 4 feet tall. ¼ Oz. 50c; Oz. \$1.75.

Plant of Harris' Extra Fancy-Leaved Coleus

## Coleus

Plants of Coleus are greatly in demand by people who want an abundance of color with a minimum of effort—For very showy ones that sell themselves, plant our Extra Fancy Mixture.

W2511—HARRIS' EXTRA FANCY MIXTURE. The leaves are uniformly large and in the brightest color combinations. The plants tend to stay low and not run up to flower until very late. We feel confident this is the best strain of seed you can possibly buy. Lg. Pkt. 50c; ¼ Oz. \$1.00; ½ Oz. \$3.25; ¾ Oz. \$6.00.

W2510—Rainbow Mixture. This formerly was the best strain we could procure and is still considered very good. ¼ Oz. 50c; ½ Oz. \$1.75; Oz. \$5.00.

## Cosmos

Cosmos have become a profitable cut flower crop since the introduction of Sensation Hybrids because of their enormous size, earliness and good keeping qualities.

	Lg. Pkt.	¼ Oz.	Oz.
W2466—Sensation, Purity White	\$ .15	.25	.75
W2467—Sensation, Pinkie	.15	.25	.75
W2468—Sensation, Dazzler Red	.15	.40	1.25
W2465—Sensation, Mixed Colors	.10	.20	.60
W2450—Early Giant Mixed	.10	.15	.35
W2460—Double Crested Mixed	.25	.50	1.75
W2475—Orange Flare	.15	.25	.75

## Cynoglossum

W2583—Blue Firmament. Compact, early, and continuous flowering. Lg. Pkt. 15c; ¼ Oz. 25c; Oz. 75c.

## Dahlias

The fact that growers who once try Harris' Dwarf Dahlias continue to buy this seed in increasing quantities convinces us that this is a profitable item. The flowers are produced from July until heavy frost in a wide range of colors from vivid reds, through soft pinks, yellows and orange to pale buff. The plants make a neat, compact growth, stems are a good length for cutting and the flowers hold up well in water, especially if dipped in hot water for a few seconds after cutting.

**W2606—Unwins Dwarf Hybrids.** For length of stem, range of color and perfection of blooms this well established variety is still the best. Height  $1\frac{1}{2}$  to 2 feet. Flowers double and semi-double. Seed sown in January will produce flowering pot plants for Mother's Day. Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 35c;  $\frac{1}{4}$  Oz. 60c; Oz. \$2.00.

## Dracaena (Spikes)

**W2750—Indivisa.** Narrow leaves; most generally used. Oz. 75c;  $\frac{1}{4}$  Lb. \$2.25.

## Gaillardia

**W2900—Annual Double Mixed.** Good outdoor cutflower. Lg. Pkt. 15c;  $\frac{1}{4}$  Oz. 30c; Oz. 85c.

## Gourds

There is profit in well grown gourds. Vegetable growers with a roadside stand find a ready retail outlet for them. Plant them along fences or at the edge of hedge rows where they can find ready support.

**W2985—Small Sorts Mixed.**  $\frac{1}{4}$  Oz. 10c; Oz. 25c;  $\frac{1}{4}$  Lb. 85c.

## Gypsophila

**W2992—Covent Garden.** This outstanding variety has very full petaled flowers which hold up very well when cut. Make successive sowings several weeks apart and have a steady income from this quick growing crop. Oz. 30c;  $\frac{1}{4}$  Lb. 85c; Lb. \$2.25.

## Helichrysum (Strawflower)

**W3070—Double Mixed Colors.** Well grown Strawflowers still find a ready market. Lg. Pkt. 15c;  $\frac{1}{4}$  Oz. 30c; Oz. \$1.00.

## Heliotrope

**W3133—Giant Blue.** Lg. Pkt. 25c;  $\frac{1}{4}$  Oz. 70c; Oz. \$2.50.

## Hollyhock

**W3127—Annual, Indian Spring.**  $\frac{1}{4}$  Oz. 45c; Oz. \$1.50.

## Kochia (Summer Cypress)

**W3190—Like bright green evergreens turning vivid red with frost.**  $\frac{1}{4}$  Oz. 10c; Oz. 25c.

Base Branching Larkspur

## Larkspur

### Imperial or Base Branching

These Imperial or base branching Larkspur are by far the best for cut flowers either under glass or outdoors. Try a sowing outdoors in late fall for early spring cutting.

**W3248—LOS ANGELES IMPROVED.** Salmon rose  
**W3254—BLUE BELL.** Mid blue  
**W3255—LILAC SPIRE.**  
**W3256—WHITE KING.** Large white  
**W3258—BLUE SPIRE.** Deep violet blue  
**W3252—CARMINE KING.** Rich, bright carmine

Any of the above colors: Lg. Pkt. 15c;  $\frac{1}{4}$  Oz. 35c; Oz. \$1.00;  $\frac{1}{4}$  Lb. \$3.00.

**W3250—VARIETY MIXTURE.** Our own mixture of the above named six best kinds.

Lg. Pkt. 15c;  $\frac{1}{4}$  Oz. 30c; Oz. 90c;  $\frac{1}{4}$  Lb. \$2.70.

## Lobelia

**W3300—Crystal Palace Compacta.** Rich dark blue flowers and dark, often bronzy foliage. Lg. Pkt. 35c;  $\frac{1}{8}$  Oz. 45c;  $\frac{1}{4}$  Oz. 85c; Oz. \$3.00.

**W3301—Cambridge Blue.** Light blue flowers in profusion above light green foliage.  $\frac{1}{8}$  Oz. 45c;  $\frac{1}{4}$  Oz. 85c.

**W3302—Bedding Queen.** Very dwarf with medium green foliage; large deep blue flowers with white eye.  $\frac{1}{8}$  Oz. 45c;  $\frac{1}{4}$  Oz. 85c.

## Lupins

**W3315—Hartwegi Mixed Colors.** Good long stemmed cut flower for greenhouse or garden.  $\frac{1}{4}$  Oz. 20c; Oz. 60c.

# MARIGOLDS

Grow all the plants you possibly can of these well known flowers. Your Victory Garden vegetable plant customers are going to have space for flowers this year so be ready for them. The dwarf, medium and tall varieties are in great demand. From our extensive trials we have selected the outstanding varieties. Note that some of them are especially suited for greenhouse growing.

## EARLY DWARF VARIETIES

**W3432—SUNKIST.** All America Silver Medal '43. The color of oranges and an inch in diameter with crested centers and several rows of guard petals. Uniformly dwarf and very compact. Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.

**W3415—HARMONY HYBRIDS** or Lg. Improved Dwarf French. New Pkt. ¼ Oz. Oz. mixture of various shades and combinations all of Harmony type \$ .15 \$ .35 \$1.00

**W3414—YELLOW PYGMY.** Small yellow double flowers on very compact dwarf plants. Excellent for early potted plants. . . . . .15 .40 1.20

**W3422—HARMONY.** Still one of the most popular. Golden center with red guard petals. . . . . .15 .25 .75

**W3421—LITTLE GIANT.** (Scotch Marigold or *Tagetes signata*.) An improved strain. Small single yellow flowers and finely cut foliage. . .15 .45 1.50

**W3411—SPOTLIGHT.** Bright yellow quilled center surrounded by mahogany red petals. Very bright .15 .35 1.00

**W3416—SPRY.** Very early flowering double golden-yellow and red. Especially good for early pots. . . .15 .40 1.20

**W3417—SCARLET GLOW.** Double flowers all red and mahogany. Same growth as Harmony. . . . .15 .45 1.50

**W3419—MELODY.** A double golden yellow of Harmony type. Uniformly 12 to 15 in. tall and early .15 .40 1.20

## MEDIUM TALL AND EARLY VARIETIES

**W3412 LIMELIGHT.** Very early, Lg. light yellow *Chrysanthemum*-Pkt. ¼ Oz. Oz. flowered. . . . . \$ .15 \$ .45 \$1.50

**W3409—GOLDEN GLOW.** Odorless foliage. Flowers 2 in. across borne 5 to 8 on a stem. . . . . .15 .45 1.50

## TALL VARIETIES

### Carnation-flowered Marigolds

Lg. Pkt. ¼ Oz. Oz.  
**W3426—YELLOW SUPREME** . . . \$ .15 \$ .35 \$1.00

**W3427—GUINEA GOLD.** . . . . .15 .35 1.00

**W3423—BURPEE GOLD** (Odorless) .15 .35 1.00

**W3424—YELLOW and GOLD MIXTURE.** . . . . .15 .30 .90

### Double African Marigolds

The All-Doubles produce greenhouse cut flowers that bring good prices. If disbudded the flowers are as showy as standard "mums."

Lg. Pkt. ¼ Oz. Oz.  
**W3404—ORANGE ALL-DOUBLE** \$ .20 \$ .55 \$1.75

**W3405—LEMON ALL-DOUBLE.** . . .20 .55 1.75

**W3400—MIXED COLORS.** . . . . .15 .45 1.50

**W3407—SUNSET GIANTS,** Mixed Colors. Mammoth double flowers .15 .45 1.50

Spry continues to be a leader

## Mignonette

**W3429—Sweet Scented.** Gaining in popularity as a greenhouse cut flower filler for spring bouquets. An old time favorite garden flower too. Oz. 30c.

## Morning Glory

Lg. Pkt. ¼ Oz. Oz.  
**W3475—HEAVENLY BLUE.** . . . \$ .15 \$ .20 \$ .65

**W3477—SCARLETT O'HARA.** The All-America Gold Medal winner for 1939. Immense deep scarlet. . .15 .40 1.25

**W3474—PEARLY GATES.** The new white-flowered All-America winner for 1942. The same growth and earliness as Heavenly Blue. . .15 .45 1.40

**W3478—Crimson Rambler.** Free-flowering medium - sized, rapid climbing. . . . . .20 .50

**W3476—Moonflower** (White) . . . . .20 .50

**W3480—Mixed Colors.** . . . . .10 .25

## Nemesia

**W3650—Triumph Mix.** Showy bedding plant. Grows 15 to 18 inches when forced. Lg. Pkt. 15c; ¼ Oz. 60c; Oz. \$2.00.

## Nicotiana

Lg. Pkt. ¼ Oz. Oz.  
**W3671—Affinis, White.** . . . . \$ .15 \$ .20 \$ .60  
**W3672—Crimson Bedder.** . . . . .25 .60 2.00  
**W3670—Mixed Colors.** . . . . .15 .20 .60  
**W3675—Suaveolens, Orange Blossom.** New low growing with medium size fragrant flowers. Lg. Pkt. 40c; ½ Oz. \$1.25; ¼ Oz. \$2.00.

## Nierembergia

### Cup Flower

**W3664—Purple Robe.** The new deep lavender cupflower so popular for edging. Uniformly dwarf and compact. Holds its color in bright sun and is good also in half shade. Lg. Pkt. 40c; ½ Oz. \$1.50.

# PANSIES

## New Swiss Giant Pansies

**W3705—MAGNIFICENT MIXTURE.** By actual tests every year on our farm, this strain of mammoth-flowered Pansies has proved to be the best. The color range includes the dark browns and reds as well as the bright shades, and is the choice of Pansy critics. **Lg. Pkt. 40c; 1/8 Oz. \$1.15; 1/4 Oz. \$2.00; Oz. \$7.00; 1/4 Lb. \$24.00.**

**W3700—EARLY MARKET MIXTURE.** Here is a new mixture of large-flowered Pansies in an unusually bright and pleasing range of colors. They start flowering very early and the plants remain low growing and very compact, with the flowers held up straight above the plant. It is our finest low-priced mixture and ideal to dig for baskets. **Lg. Pkt. 35c; 1/8 Oz. 90c; 1/4 Oz. \$1.50; Oz. \$5.00; 1/4 Lb. \$17.00.**

**W3703—MAPLE LEAF GIANTS, Mixed Colors.** The largest flowers of all Pansies. Blue and yellow shades predominating on long stems. **Lg. Pkt. 40c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.25; Oz. \$8.00.**

## Pansies in Separate Colors

**W3735—WHITE SWISS.** Large Lg. creamy white. Compact plants bloom continuously through the summer. **Pkt. 1/8 Oz. 1/4 Oz. \$ .50 \$1.25 \$2.25**

**W3736—PORCELAIN BLUE.** Clear pale blue with deeper blue blotch. Compact plants, continuous bloom. **.50 1.25 2.25**

**W3738—SWISS BLUE.** Large dark blue that combines beautifully with the other colors. **.50 1.25 2.25**

**W3739—SWISS RED.** Rich mahogany red with just enough variation to give them "class" **.50 1.25 2.25**

## Viola

Our seed of this everblooming pansy-like strain is of unusually high germination.

	<b>Lg. Pkt. 1/8 Oz. 1/4 Oz.</b>
<b>W3761—White Perfection.....</b>	<b>\$ .30 \$ .75 \$1.25</b>
<b>W3762—Chantreyland. Apricot.....</b>	
<b>W3760—Mixed Colors.....</b>	<b>.25 .55 .95</b>

# Selected GIANT PETUNIAS

The average florist or plant grower confronted with the long lists of Petunias presented each year must be appalled at the necessity of making wise selections from those lists. We believe it is our job to present an "easy to order from" list so from the hundreds of petunias which are grown in our trials each year these are the ones we recommend as outstanding for color, form and performance under field conditions.

## Giant Ruffled Petunias

### A Harris Specialty and A Florists' Favorite

**W3802—PARAMOUNT GIANTS, Mixed Colors.** An extra fine strain of our own growing especially selected for florists' use. The immense deep-throated well ruffled flowers are on low-growing compact plants that do not run up tall during the summer. They start flowering when the plants are very small, making them exceptionally good for spring sales. The colors are selected for brightness and include a large percentage of red and white blotched. **500 seeds 65c; 1000 seeds \$1.00; 1/8 Oz. \$2.25; 1/4 Oz. \$3.75; 1/2 Oz. \$6.75; 1/4 Lb. \$10.00.**

**W3808—SALMON BEAUTY.** A giant bright salmon-pink. Immense well ruffled flowers with golden throat. An excellent florist's variety. Similar to the new "Glamour." **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

**W3811—QUAKER LADY.** Giant ruffled petals of a soft rosy lilac shading to pinkish white at the edges. Added elegance is attained by the veining of rich purplish blue which reaches into the deep open throat. **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

## Giant Waved Petunias

### Ideal For Plant Sales

**W3809—ROYALTY.** Here is a new Petunia that will make more customers for you. A bed or border of these beautiful big velvety flowers in their varying combinations of deep purple and white will attract everyone's attention. In 3-in. pots, grown cool, they are a "sell-out." **1/4 Oz. 50c; 1/2 Oz. 90c; 1/4 Lb. \$1.50; 1/8 Oz. \$2.50.**

**W3814—GIANT SNOWSTORM.** Very large, waved, pure white flowers on low growing plants. Blooms constantly in the garden and sells well as potted plants. **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

**W3816—HARRIS' PURPLE PRINCE.** Not to be confused with any other "Purple Prince" offered. This is distinctly different. The largest flowered, deep, velvety violet-blue. Large open throats and waved petals. Very free flowering. **1/4 Oz. 50c; 1/2 Oz. 90c; 1/4 Lb. \$1.50; 1/8 Oz. \$2.50.**

## Fringed Petunias

### Especially For Plant Growers

**W3807—DAINTY LADY.** Dwarf plants with fringed creamy yellow flowers in abundance. **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

**W3812—MARTHA WASHINGTON.** A very dwarf compact plant covered with fringed blush-pink flowers veined wine-red. Very late flowering in some Northern sections. **1/4 Oz. 50c; 1/2 Oz. 90c; 1/4 Lb. \$1.50; 1/8 Oz. \$2.50.**

**W3789—DOUBLE FRINGED MIXED.** A very good stock from California with about 50% coming double; the remainder with beautifully arranged petals. Remember, in transplanting, that the weakest seedlings are more apt to produce double flowers. **500 seeds \$1.25; 1000 seeds \$2.00.**

**W3813—THEODOSIA.** We know we have the best strain of this popular bright pink with golden center. Large and well fringed. **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

**W3817—THE ART.** Also called "Columbia." An exceptionally free-flowering fringed Petunia in unusual color combinations of bright reds and white, mostly in blotches. Very effective for pot-plant sales. **1000 seeds 60c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; 1/2 Oz. \$3.50; 1/4 Lb. \$6.50.**

# Outstanding BEDDING PETUNIAS

*Selected and Bred by Specialists*

We expend much time and effort on producing strains of these popular flowers that are uniform in color and height, and are continuing our breeding work in spite of the war, working to produce more perfect strains. We know what the grower wants and we make every effort to see that he gets it. Varieties that sell well and satisfy his customers are uppermost in our minds when we present the following list.

## Two New Harris Petunias

### All-America Winners for 1943

**W3851—IGLOO.** A new low growing compact pure white with a touch of soft yellow in the throat. The plants make perfect mounds of white that provide a continuous mass of bloom throughout the season. Introduced by us last year there is every indication that there will be a great demand for plants this spring. Lg. Pkt. 40c;  $\frac{1}{16}$  Oz. 85c;  $\frac{1}{8}$  Oz. \$1.50;  $\frac{1}{4}$  Oz. \$2.50; Oz. \$7.50.

**W3847—ENGLISH VIOLET.** Once we decided on this name no other could possibly have suited it better. Viewed from a distance our fields in which it is being grown for seed look like one huge English Violet corsage. Upright plants 15 inches tall bear hundreds of blooms all season. Include English Violet in your spring plant sales. Lg. Pkt. 40c;  $\frac{1}{16}$  Oz. 75c;  $\frac{1}{8}$  Oz. \$1.25;  $\frac{1}{4}$  Oz. \$2.00; Oz. \$6.50.

**W3826—CELESTIAL ROSE.** The finest all-purpose bright pink. A more attractive shade and more compact growing than Rose of Heaven. A clear pink without the large white throat of Rosy Morn. This is the most compact and uniform growing strain. Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3827—HEAVENLY BLUE.** Improved. This is the light blue so much in demand for plants but generally very variable in color. We are finally able to produce a much improved strain. In the field, the color was 100% true clear, light-blue and the plants uniformly low and compact.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3825—DARK PURPLE.** A very much improved stock; more compact growing and a deep velvety dark blue-purple.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3821—WHITE PERFECTION.** A new white, more uniform in growth and of the same compact habit as Celestial Rose. Most white Petunias offered are much taller.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3823—ROSY MORN.** An unusually good strain of the ever-popular white-throated pink for bedding, boxes, etc. The flowers are large and the plants remain uniformly low growing even during the extremely hot weather.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3829—ELEANOR BLUE** It has taken us four years to get this desirable mid-blue back into production. The color is a pleasing shade of deep lilac, different from the other mid-blues, and more desirable. The plants are semi-dwarf, but unusually uniform in height and color.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3842—FIRST LADY** A new very beautiful clear salmon-pink on dwarf upright growing plants. Also called "Fair Lady." The most pleasing shade of pink ever seen in any Petunia, and sure to become the most popular.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

**W3844—CREAM STAR.** We consider this the best white bedding Petunia ever introduced. The plants are uniformly compact and do not get "leggy." All summer they are a perfect mound of large creamy-white flowers. All of your customers will repeat on this one.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 55c;  $\frac{1}{4}$  Oz. 85c; Oz. \$2.80.

From fields like this we select our strain of  
**CELESTIAL ROSE**

**W3836—HARRIS' BLACK PRINCE.** An improved strain resulting from rigid selection. A dwarf "Flaming Velvet" similar to "Velvet Ball." The color is the darkest red it is possible to imagine, while the plants are uniformly compact growing. We found it to be one of the best selling Petunias in the spring plant trade. Lg. Pkt. 40c;  $\frac{1}{16}$  Oz. \$1.00;  $\frac{1}{8}$  Oz. \$1.75;  $\frac{1}{4}$  Oz. \$3.00; Oz. \$10.00.

**W3843—GLOW** Low growing, large flowered, and the brightest light scarlet of all Petunias. This strain of our own growing is the most uniform we have ever seen. Lg. Pkt. 40c;  $\frac{1}{16}$  Oz. \$1.00;  $\frac{1}{8}$  Oz. \$1.75;  $\frac{1}{4}$  Oz. \$3.00; Oz. \$10.00.

**W3824—TOPAZ ROSE.** The deepest pink Bedding Petunia with a golden throat. A little taller than the other "Low-Growing Bedding Petunias." A very showy and pleasing color and free blooming.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 35c;  $\frac{1}{4}$  Oz. 60c; Oz. \$2.00.

**W3822—SALMON SUPREME.** The new true salmon bedding Petunia. Gold Medal All-America winner for 1938. Very low and compact and a pleasing shade. Lg. Pkt. 40c;  $\frac{1}{16}$  Oz. \$1.00;  $\frac{1}{8}$  Oz. \$1.75;  $\frac{1}{4}$  Oz. \$3.00; Oz. \$10.00.

**W3846—RADIANCE.** The new 1940 All-America winner. Brightest cherry-red with golden throat. Very vigorous and free-flowering. Taller than the other bedding varieties.

Lg. Pkt. 25c;  $\frac{1}{8}$  Oz. 35c;  $\frac{1}{4}$  Oz. 60c; Oz. \$2.00.

## A Better Mixture

**W3840—HARRIS' SPECIAL FOUR-COLOR MIXTURE.** Here is an unusually fine mixture especially made up for particular buyers. We make this mixture from the same fresh, new-crop seed described above, using carefully balanced proportions of Celestial Rose, White Perfection, Dark Purple and Heavenly Blue.

Lg. Pkt. 20c;  $\frac{1}{8}$  Oz. 35c;  $\frac{1}{4}$  Oz. 60c; Oz. \$2.00.

## Phlox

**Drummondii Grandiflora** (15 to 18 in. tall)

Lg. Pkt.  $\frac{1}{8}$  Oz.  $\frac{1}{4}$  Oz. Oz.  
W3860—Mixed Colors..... \$ .25 \$ .50 \$ .85 \$3.00

## Poppy

W3900—Shirley Single and Double Mixed.

Lg. Pkt. 10c;  $\frac{1}{4}$  Oz. 20c; Oz. 50c.

W3903—Shirley Sweet Briar. Double rose pink.  $\frac{1}{4}$  Oz. 20c; Oz. 60c.

## Portulaca

Lg. Pkt.  $\frac{1}{8}$  Oz.  $\frac{1}{4}$  Oz. Oz.

W3870—DOUBLE, Mixed Colors..... \$ .25 \$ .50 \$ .85 \$3.00

W3880—SINGLE, Mixed Colors..... .20 .35 .65 2.00

## Salpiglossis

W4500—LARGE FLOWERED MIXED. For cut flowers indoors or out, there is no flower of richer color. Lg. Pkt. 15c;  $\frac{1}{4}$  Oz. 30c; Oz. \$1.00.

Spikes of Harris' Special Northern Grown Salvia

# Salvia

W4600—HARRIS' BONFIRE. With the florist, the name of Harris has become synonymous with superior quality and high germinating Salvia seed. Our own special strain of Bonfire Salvia has met with increasing popularity. The spikes are large, long, and the florets placed very closely together. The growth is as uniform as though it had been sheared. The color is of a brighter shade than any other variety, and the germination higher. *Only our large quantity production makes possible this continued low price.* Lg. Pkt. 30c;  $\frac{1}{8}$  Oz. 60c;  $\frac{1}{4}$  Oz. \$1.10; Oz. \$3.75;  $\frac{1}{4}$  Lb. \$12.50.

W4602—SALVIA AMERICA (Globe of Fire). A little taller and later than Firebrand, America is still the standard with many growers. Our strain, is especially uniform in height and earliness. Lg. Pkt. 35c;  $\frac{1}{8}$  Oz. 80c;  $\frac{1}{4}$  Oz. \$1.50; Oz. \$4.50;  $\frac{1}{4}$  Lb. \$15.00.

W4603—FARINACEA, Blue Bedder. Ideal for cutting. Long-stemmed graceful sprays of an attractive shade of light-blue. The 2-ft. tall plants grow in the same way as Bonfire Salvia and continue to bloom until freezing weather.

Lg. Pkt. 35c;  $\frac{1}{8}$  Oz. 60c;  $\frac{1}{4}$  Oz. \$1.00; Oz. \$3.50.

*"Your Stocks bloomed undaunted through all the heat and drought of last summer. No wonder you named them "Sure to Bloom."*

P. W. Williams, Philadelphia, Penn.

## SCABIOSA

Here is a cut flower for which there is an increasing demand. No other flower has such a wide range of rich colors. Grow them as a spring greenhouse crop. A summer crop may be had from transplants and a fall crop from seed sown outdoors. Try the separate colors or our carefully blended mixture.

The new Dwarf Scabiosa are becoming very popular for bedding and garden work. Grow some of them for your plant trade.

	Lg. Pkt.	$\frac{1}{4}$ Oz.	Oz.

## Schizanthus

W4638—LARGE FLOWERED MIXED.  
 $\frac{1}{4}$  Oz. 25c; Oz. 75c.

## STOCKS

### Harris' "Sure-To-Bloom" Stocks

A new strain of the "10-Weeks" type. In our tests they have never failed to bloom 100% from seed sown out-doors in May.

The plants start flowering while very small and continue to grow and bloom all summer and autumn. The final height is 15 to 18 inches.

	Lg. Pkt.	$\frac{1}{4}$ Oz.	Oz.
W6024—Azure Blue.....	\$ .30	\$ .70	\$2.10
W6023—Blood Red.....			
W6026—Canary Yellow.....			
W6025—Dark Blue.....

W6022—Flesh Pink.....			
W6027—Rose.....	}		
W6020—VARIETY MIXTURE.....			
	.20	.60	1.80

### New Giant Imperial Stocks

W6000—VARIETY MIXTURE. A special mixture we make by using equal amounts of the following six separate colors: White, Yellow, Rose, Azure, Dark Blue, Blood Red. These are the finest giant-flowered double branching, tall growing Stocks obtainable. Lg. Pkt. 25c;  $\frac{1}{4}$  Oz. 35c;  $\frac{1}{4}$  Oz. 60c; Oz. \$2.00.

## Snapdragons

### Colossal Tall Snapdragons

Seeing a bouquet of these new Snapdragons for the first time it is hard to believe that they are not greenhouse grown. The stems are longer, the florets larger and the spikes more completely filled out than the Giant Flowered varieties. The plants are large, vigorous and early flowering. **If rust does not prevail in your locality by all means plant these Colossal Snapdragons.**

W5031—Colossal White.....	Lg.			
W5032—“Pink Shades.....	Pkt. 1/8 Oz. 1/4 Oz.			
W5034—“Yellow.....	\$ .30 \$ .60 \$1.00			
W5035—“Crimson.....				
W5036—“Orange Shades.....				
W5030—Colossal Mixed Colors.				

Lg. Pkt. 20c; 1/8 Oz. 50c; 1/4 Oz. 85c; Oz. \$2.80.

### Tall Giant Flowered Snapdragons (Rust-Resistant)

These are the finest Tall Snapdragons we can buy. They are American grown, and fresh seed is of high germination. The flowers are large and well placed on stems growing 2 to 2 1/2 feet high. For plant trade, the seed is usually started in early February.

W5051—Pure White.....	Lg.			
W5052—Autumn Glow. Beautiful terra-cotta pink.....	Pkt. 1/8 Oz. 1/4 Oz. Oz.			
W5053—Bright Rose.....				
W5054—Wallflower Red. Brown and red combinations.....	\$ .25 \$ .55 \$ .95 \$3.00			
W5055—Crimson. Deep red with dark foliage.....				
W5056—Orange.....				
W5057—Canary Yellow.....				

W5050—VARIETY MIXTURE. Our own special mixture, using proper amounts of the seven colors. An exceptional mixture for plant trade.

Lg. Pkt. 15c; 1/8 Oz. 40c; 1/4 Oz. 70c; Oz. \$2.50.

### Half-Tall Snapdragons

W5107—ST. GEORGE. A very free-flowering brilliant orange-cerise of compact growth. Large flowers on heavy spikes. Lg. Pkt. 25c; 1/8 Oz. 50c; 1/4 Oz. 75c.

W5108—ROYAL ROSE. The richest and brightest rose imaginable. Free-flowering on compact plants. Lg. Pkt. 25c; 1/8 Oz. 50c; 1/4 Oz. 75c.

W5109—GUINEA GOLD. A beautiful combination of gold and apricot. Larger flowers on compact spikes. Lg. Pkt. 25c; 1/8 Oz. 50c; 1/4 Oz. 75c.

W5115—NEW COLOR MIXTURE. Rust Resistant. Here is something special in a mixture of Half-Tall (18-24 inches) Snapdragons. It is a mixture we make by using the light and unusual colors. Might be called a “Pastel Mixture.” Good for plant trade. Lg. Pkt. 25c; 1/4 Oz. 65c; Oz. \$2.25.

### Snow-On-The-Mountain

W5192—EUPHORBIA. 1/4 Oz. 15c; Oz. 35c.

### STATICE SINUATA

“Everlasting” flowers for winter bouquets. Flowers well outside if sown early in greenhouse. Grow in warm, light soil.

W6171—White.....	1/4 Oz. Oz. 1/4 Lb.			
W6172—Superb Rose.....	\$ .15 \$ .30 \$ .90			
W6174—Bondielli, Yellow.....				
W6175—Navy Blue.....				
W6170—Mixed Colors.....	.15 .25 .75			

## Sweet Peas

### EARLY FLOWERING

Winter or Early Flowering Sweet Peas are best for forcing under glass or early blooming outdoors. The following selection is the result of extensive trials on our own farms. We selected only the best kinds.

W7001—Hope. Pure white.....	Oz. 1/4 Lb.		
W7003—Pride. Pure cerise.....			
W7013—Mariner. Clear marine blue.....			
W7011—Star (New). An improvement of Ball Rose. The best rose.....	\$ .45 \$1.35		
W7007—Mrs. Hoover. Clear Blue.....			
W7012—Memory. Clear lavender.....			
W7004—Boon. Salmon pink.....			
W7015—Bridesmaid. Silvery pink.....			
W7014—Mars. Oxblood red.....			
W7050—MIXED COLORS. Lb. \$4.00.....	.35 1.25		

### SIX NEW SPRING-FLOWERING SWEET PEAS

A new type starting to flower earlier than Spencers, and continuing throughout the hot weather. More vigorous and heat resistant. Immense flowers and long stems.

W7113—Rose-pink.....	Oz. 1/4 Lb. Lb.		
W7114—Lavender.....			
W7115—Blue.....	\$ .65 \$2.25		
W7111—White.....			
W7112—Clear Pink.....			
W7110—MIXED COLORS.....	.50 1.50 \$5.00		

### SPENCER OR SUMMER FLOWERING

The wonderful large wavy or “orchid flowered” Sweet Peas for outdoor summer blooming. We have selected the best of the new vigorous growing kinds. There are no better.

W7502—Pinkie. Rose pink.....	Oz. 1/4 Lb. Lb.		
W7507—Welcome. Scarlet.....			
W7508—Pirate Gold. Golden orange.....			
W7509—Red Boy. Crimson.....			
W7510—King Lavender. Lavender.....	\$ .30 \$ .85 \$2.50		
W7501—Gigantic. Pure white.....			
W7515—Amethyst. Clear blue.....			
W7504—Mastercream. New cream.....			
W7503—Ecstasy. New blush pink.....			

W7675—SPECIAL VARIETY MIXTURE. A mixture we make up using seed of all the above nine different colors. Oz. 25c; 1/4 Lb. 75c; Lb. \$2.25.

W7550—SUPERB MIXTURE. A well-balanced mixture of a great many different kinds. Oz. 20c; 1/4 Lb. 60c; Lb. \$2.00.

### RUFFLED SWEET PEAS

W7600—Mixed Colors. A new type with large wavy petals and including a wide range of colors. Oz. 25c; 1/4 Lb. 75c; Lb. \$2.25.

### Sunflower

W6195—SUNGOLD. Sunflowers that grow only 4 to 5 ft. high but produce large 100% double flowers in great profusion. Plant them along the roadside or near your roadside stand. 1/4 Oz. 30c; Oz. \$1.00.

### Thunbergia

W7940—ALATA (BLACK - EYED SUSAN).

This little vine having yellow and creamy-white flowers with black centers is an old-timer that is popular again. 1/4 Oz. 30c; Oz. \$1.00.

# ZINNIAS

Each year we try nearly all of the different kinds and colors of Zinnias in order to be sure to offer you only those we find to be the best.

No effort is required to sell Zinnia plants and since excellent results are obtained from seedlings, seed may be sown in a hot bed in late April for May plant sales. Again, this year our Giant Two Tone Mixture attracted favorable comments from all who saw it. Since the Zinnia is a flower that amateurs know and love, plant seeds of the various varieties listed below.

## A New Giant Zinnia Mixture

**W8160—Giant "Two Tone" Light Color Mixture.** Enormous flowers in pastel shades of rose yellows, buff salmons, etc. The petals shade to yellow and gold at the base giving the flowers a two tone effect. Grow these largest of all Zinnias for the cut flower market and the plants for the "good gardeners" among your customers. **Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.10; ¼ Lb. \$3.50.**

## Giant Flowered Zinnias

W8131—Purity. Best white.....	Lg.		
W8137—Miss Wilmott. Soft pink..	Pkt. ¼ Oz.	Oz.	
W8146—Violet Queen. Dark Purple			
W8147—Cherry Queen. Rosescarlet.			
W8149—Illumination. Bright pink.			
W8151—Orange King. Bright orange	\$ .15	\$ .40	\$1.10
W8152—Oriole. Orange and gold..			
W8153—Exquisite. Bright rose....			
W8154—Canary Bird. Canary yellow			
W8155—Crimson Monarch. Dark..			
W8156—Golden Dawn. Yellow.....			

**W8120—MAGNIFICENT VARIETY MIXTURE.** A special mixture of all the kinds described above. **Lg. Pkt. 15c; ¼ Oz. 30c; Oz. 90c; ¼ Lb. \$3.00; Lb. \$9.00.**

**W8150—GOLD MEDAL MIXTURE.** A good quality lower priced mixture containing all colors and shades, grown as mixture. **Lg. Pkt. 15c; ¼ Oz. 25c; Oz. 75c; ¼ Lb. \$2.50; Lb. \$7.50.**

## New Pompon Zinnias

This new race of Zinnia is especially good for cut flowers. The flowers are small, full double and borne in profusion eight weeks from sowing.

W8231—White.....	Lg.		
W8232—Salmon.....	Pkt. ¼ Oz.	Oz.	
W8233—Yellow.....			
W8234—Scarlet.....	\$ .15	\$ .30	\$1.00
W8236—Orange.....			
W8237—Purple.....			
W8238—Black Ruby.....			
W8230—VARIETY MIXTURE.			
..... ¼ Lb. \$2.50	.15	.25	.75

## Cut-&-Come-Again

Medium size flowers, ideal for cutting. Many florists sow ½ lb. and more outdoors in drill rows. The following are the two most desirable colors.

	Lg. Pkt. ¼ Oz.	Oz.	¼ Lb.
W8262—Salmon Rose.....	\$ .15	\$ .30	\$1.00 \$3.00
W8263—Spun Gold.....			
W8260—SPECIAL MIX- TURE of the two colors...	.15	.25	.75 2.50

## Mexican Zinnias

**W8280—HAAGEANA, Mixed Colors.** We know of no flower that gives greater satisfaction. The small single, semi-double and double blossoms an inch or less in diameter are variegated mahogany, red, orange yellow and cream, no two exactly alike in their markings. Height 12 to 15 inches. Continuous bloom. Since they are slower than the other zinnias, plant them a week or ten days earlier for sale as seedlings or transplants.

**Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.10.**

Giant "Two-Tone" Zinnia

## Fantasy Zinnias

A new type with long curled and twisted petals making them very attractive. The flowers are of medium size on long clean stems. Good for cutting and increasing in popularity.

**W8285—MIXED COLORS.**

**Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.10.**

## New Cupid Zinnias

**W8220—CUPID VARIETY MIXTURE.** Good bedding type more dwarf in habit than the Pompons bearing a profusion of very small double flowers.

**Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.25.**

## Creeping Zinnias

**W4686—SANVITALIA Procumbens.** Grows only 4 to 5 in. high, spreads from 12 to 15 in. Small double bright yellow flowers with a dark eye. Blooms all summer. Excellent for edging, mass planting and rock gardens. **¼ Oz. 40c; Oz. \$1.20.**

# Verbenas

## MAMMOTH FLOWERING

W8003—Rose Queen.....	Lg.		
W8004—Lavender Glory.....	Pkt. ¼ Oz.	¼ Oz.	Oz.
W8005—Purple King.....	\$ .30	\$ .50	\$ .90 \$2.50
W8007—Red Emperor.....			
W8008—Snowstorm.....			
W8015—VARIETY MIX- TURE. An excellent mixture carefully proportioned using the above five colors.....	.20	.35	.65 2.00
W8025—ROYAL BOUQUET Mixed Colors. Upright grow- ing for edging. Increasing in popularity.....	.30	.55	.95 3.00

# HARDY PERENNIAL SEED

These days when wholesale flower markets are desperate for cut flowers of all kinds, wise growers are devoting more outdoor space to perennials for cut flowers. Plant growers too, should be ready with well grown perennial plants for those perennial borders that have been neglected for several years. Much of Harris' perennial seed is grown on our own farm from carefully selected stock. The following are the perennials that can be grown most satisfactorily from seed.

	Lg. Pkt.	¼ Oz.	Oz.
<b>ALYSSUM</b> (Basket of Gold)

W2910— <b>Dazzler</b> , Red and yellow.....	.15	.35	1.00
W2912— <b>Burgundy</b> , Red.....	.25	.60	2.00

## Aquilegia

**W2074—HARRIS' EXHIBITION HYBRIDS.** Vigorous plants producing large long spurred flowers in a wide range of colors are the aim of all who grow this very popular perennial. Our breeding and selection have produced a strain that surpasses many in our trials. Lg. Pkt. 35c; ¼ Oz. 85c; Oz. \$3.00.

**W2075—Long Spurred Blue Shades.** To satisfy the great demand for good blue Aquilegia. Lg. Pkt. 40c; ¼ Oz. \$1.00.

## Delphinium

Harris seed comes from plants carefully selected for vigor, size of flower spikes and good color. It is fresh and of good germination.

**W2641—MONARCH STRAIN.** Our own selection of outstanding material from the best strains on the market. Many of our customers prefer this to the higher priced varieties because it is grown under northern conditions and requires no coddling. Lg. Pkt. 40c; ½ Oz. 75c; ¼ Oz. \$1.25; Oz. \$4.00.

**W2640—MORETON HYBRIDS.** A good dependable mixture that is not flashy but has stood the test for many years and is still very popular. The low price is possible because of our quantity production. Lg. Pkt. 15c; ¼ Oz. 35c; Oz. \$1.00.

**W2642—DOUBLE WHITE.** Continued careful selection from 100% double flowers assures you of a high percentage of double, pure white flowers on vigorous plants. Lg. Pkt. \$1.00; ½ Oz. \$1.75; ¼ Oz. \$3.00; Oz. \$10.00.

**W2665—PACIFIC HYBRIDS.** These new giants from the Pacific coast are rapidly becoming the outstanding cut-flower Delphinium. Flowers are mostly double and semi-double in a range of shades, tones and combinations never before seen in Delphiniums. Lg. Pkt. 60c; ½ Oz. \$1.25; ¼ Oz. \$2.25; Oz. \$8.00.

**W2645—BELLADONNA.** The standard light blue for florists. Lg. pkt. 20c; ¼ Oz. 50c; Oz. \$1.50.

**W2650—CHINENSIS** (Butterfly Delphinium). Blue and White. Still the most adaptable Delphinium for corsage and small bouquet work. Seed planted in early spring will produce a cutting in early fall. Lg. Pkt. 15c; ¼ Oz. 30c; Oz. 85c.

	Lg. Pkt.	¼ Oz.	Oz.
<b>GEUM</b>			
W2921— <b>Mrs. Bradshaw</b> , Scarlet.....	\$ .25	\$ .60	\$2.00

## Forget-Me-Not

(Myosotis Alpestris)

**W3493—Royal Blue.** The standard for spring plant sales. Our strain is uniform in height and color. ¼ Oz. 65c; Oz. \$2.00.

**W3490—Mixed Colors.** A well balanced mixture of blue, pink and white. Very popular in some sections. ¼ Oz. 50c; Oz. \$1.75.

## Lupins

**W3335—NEW RUSSELL, Harris' Supreme Mixture.** Each year as our Russell Lupins come into bloom we are impressed anew with the 3 ft. spikes. We have been making selections since their introduction so the vigor of plants and color range of pink, rose, buff, bronze and rust red cannot be duplicated. Lg. Pkt. 25c; ¼ Oz. 35c; Oz. \$1.00.

## Regal Lily

**W3355—Lilium regale.** So easy to grow from seed; so easy to sell. Supplies of good bulbs are depleted. Why not start a stock of your own? Bulbs from seed are vigorous and disease free and three year bulbs are saleable. Sow in soil made slightly acid by the addition of leaf mold and in a spot that can be given some shade. ¼ Oz. 30c; Oz. \$1.00.

## Scabiosa Caucasica

**W4663—Perfecta.** The finest light-blue outdoor cut-flower and very popular for plant trade. Blooms all summer. High germinating seed of our own growing. Lg. Pkt. 30c; ¼ Oz. 75c; Oz. \$2.50.

## Sweet William

**W6132—Newport Pink.** Beautiful salmon shade.

Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.25.

## HOTKAPS

**HOTKAPS** are scientifically constructed wax paper cones, which are placed over the plant or hill of seeds. Their use enables the grower to set out his plants or plant his seed as soon as the ground is warm. They afford protection to the young plants from frost, wind and beating rains and insects.

100 with Fibreboard Setter.....	\$ 2.20 postpaid
250 with Fibreboard Setter.....	3.95 postpaid

## "OPEN-HED" SPRAYERS

A limited quantity of new galvanized 4 gal. "Open-Hed" Sprayers are again available. These are the same fine type of hand sprayers that we formerly sold.

The seams are all electrically welded, and the sprayers are galvanized after the welding which prevents rusting and cracking along the seams. Equipped with double acting pump lock and double grip rubber pump handle. Opening 5 in. in diameter for easy filling and cleaning.

**No. 4D Open-Hed Galvanized.....\$7.75**

Transportation charges prepaid in the U. S. east of the Mississippi River and North of Tennessee.

**PLANET JR.** For tools and parts see Retail Catalog.

## HOTENTS

Larger area and taller, wire reinforced. See photo for size and shape. Measures 10½ x 14½ x 8½, or 152½ sq. in. at base. Will stand up under adverse conditions. Some of our customers have found *Hotents* especially valuable for growing melons and use many thousands each year.

**Note:** Purchaser pays transportation, except where quoted "postpaid." When ordering please be sure to tell us how to ship

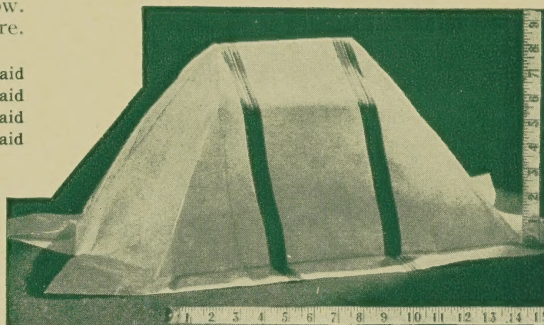

Photo shows size and shape of Hotent

## WHITE PARCHMENT PAPER

Used by large growers everywhere for wrapping celery, etc. Plain, not printed.

1000 sheets per box. **Not postpaid.**

	1 box	5 boxes or more
8 x 11 in.....	\$1.50 ea.	\$1.45 ea. (wt. 7 lbs. ea.)
9 x 12 in.....	1.80 ea.	1.75 ea. (wt. 8 lbs. ea.)

## RAFFIA

Used for tying plants to stakes, budding and grafting, etc. Comes in braided plaits or hanks weighing about ½ lb. each.

1 hank 30c; 10 hanks \$2.50; postpaid.

## "FERTILE" POTS

**For Better, Earlier Crops!**

Seedlings set in these pots can be grown and then set in the field, pot and all, without checking the plant. These pots are made of manure with just the right amount of fertilizer for the best plant growth.

Large growers find these pots not only save time and labor but actually produce earlier fruit and better yields. Especially valuable for Early Cabbage, Eggplant, Peppers, Tomatoes, Melons, Squash, etc.

**PRICE:** Fertile Pots are packed in cartons as follows:

No. 2 (about 2" dia.) per carton of 500.....	\$4.75
No. 2½ (about 2½" dia.) per carton of 500.....	5.50
No. 3 (about 3" dia.) per carton of 250.....	3.25

Transportation not paid. Weight about 45 lbs. per carton.

## "FOR THE DURATION"

We cannot supply Weeders, Rubber Bands, Formaldehyde, or Sulrote.

## WHOLESALE PRICE LIST

*For Market Gardeners and Florists*

### *Quality Squash* • THE BEST SMALL WINTER SQUASH

For over 20 years we have raised this remarkable variety on our own farms and we have yet to find a better looking or finer flavored squash. It is the ideal type for modern markets where the medium size, high quality type is preferred. The handsome shape, thick flesh and the wonderful dry rich flavor always bring the customers back for more . . . See page 30.
